## Depositary

NatWest Trustee and Depositary Services Limited 250 Bishopsgate London EC2M 4AA Authorised and regulated by the Financial Conduct Authority

## Investment objective and policy

## Investment objective

The objective of the fund is to deliver a greater total return than the Bank of England's Base Rate +2%, after fees, over any three-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than one-third of the volatility of the FTSE Developed stock market Index.

There is no guarantee that this investment objective will be achieved over three years, or any other time period.

We aim to deliver this return with no more than one-third of the volatility of the FTSE Developed stock market Index. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

## Investment policy

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

3 Rathbone Multi-Asset Portfolio

## Investment report for the year ended 30 September 2023

#### **Performance**

Over the year ended 30 September 2023, the Rathbone Total Return Portfolio Fund (S-class shares) gained 3.6%. For the same period the fund's benchmark, the Bank of England Base Rate + 2%, returned 6.1%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 40%, compared with a target of 33%.

## Portfolio activity

As bond yields kept rising around the world, we added to our holdings of the US Treasury 1.875% 2032, and the UK Treasury 1.5% 2026, 1.125% 2039 and 0.875% 2033. Even as we added to our government bond holdings overall, we took advantage of pretty significant fluctuations in yields throughout the period. This meant buying more when yields rose (i.e. when prices fell) and selling some of them as yields dropped (and prices rose). The largest of these trims was the UK Treasury 4.25% 2032.

In late 2022 we sold our Canadian Government 0.5% 2030 bonds because we preferred US Treasuries. Rates should be peaking soon, so we think it makes sense to add to safe-haven assets to protect ourselves if yields fall suddenly, as they would if the world tumbles into recession. Government bond prices have been bouncing up and down a lot over the past six months as investors judge central bankers' fight against inflation and gauge the likelihood of recession. We've tried to take profits when prices are higher (and yields lower), and buy them back when prices are lower (yields higher).

Towards the end of the period, we started to length the average maturity of our government bond portfolio, which has the effect of making the value of our bond exposure more sensitive to changes in prevailing yields. This meant we sold the US Treasury 2.5% 2024 and the UK Treasury 1.5% 2026 and 0.875% 2033 and bought bonds that mature further into the future

In January we bought a new diversifier which takes advantage of an idiosyncratic feature of European equity option markets. Large Continental insurers are pressured by regulation to each week buy very short-dated put options — a kind of insurance contract on the stock index. This is to make sure

that a big drop in stock markets doesn't wipe out the assets required to pay out their customers' insurance claims. As you can imagine, that creates a huge amount of demand for short-dated put options, which (like anything) pushes up their price. The Bank of America European Catapult structured product sells these structurally overpriced put options and then uses half of the money it receives. to simultaneously buy slightly longer-dated puts at keener prices. This strategy therefore makes money regardless of whether stock markets rise or fall because it simply pockets the difference between the two put prices. It should also make money if market volatility increases because it is 'long' the slightly-longer-dated put, and its value is more sensitive to changes in volatility because of its longer life. We could lose out, however, if markets fall gracefully – i.e. even as volatility drops (this can happen).

#### Market overview

Benchmark government bond yields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between, making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond yield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well – particularly stock markets.

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis — regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

## Investment report for the year ended 30 September 2023 (continued)

Higher interest rates and bond yields mean that borrowing is harder to come by for households and businesses, and while this hasn't yet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, vields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and yes, this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash, and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

David Coombs Lead Fund Manager 18 October 2023

Will McIntosh-Whyte Fund Manager

## Risk and reward profile

## Risk and reward profile as published in the fund's most recent Key Investor Information Document

Lower potential risk/reward (Not risk-free)

Higher potential risk/reward

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

## Discrete annual performance

#### Discrete annual performance, year ending 30 September 2023

|                       | 2019  | 2020  | 2021  | 2022   | 2023  |
|-----------------------|-------|-------|-------|--------|-------|
| R-class shares        | 5.07% | 1.42% | 7.28% | -5.88% | 2.78% |
| S-class shares        | 6.04% | 2.27% | 8.10% | -5.08% | 3.60% |
| LIBOR GBP 6 month +2% | 2.78% | 2.40% | 2.10% | 2.79%  | 6.11% |

Source performance data FE fundinfo, mid to mid, net income reinvested.

Past performance should not be seen as an indication of future performance.

The value of investments and the income from them may go down as well as up and you may not get back your original investment.

## Notes to the financial statements

## 1 Accounting policies

## a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the "revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014, and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

#### b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

## d) Treatment of expenses

All expenses (excluding overdraft interest) are charged against capital.

#### e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities. ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available. daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts, market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements.

#### 1 Accounting policies (continued)

## f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

## g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

## 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, the ACD's charge (net of any tax relief) is deducted from capital, offsetting expenses after ACD's charge. Capital may constrain future growth in revenue and capital.

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

There may be instances where marginal tax relief is due to/from revenue for the utilisation of allowable expense.

| Corporate tax                     | 1,481,365     | 607,004       |
| Double taxation relief            | (7,315)       | (4,116)       |
| Overseas tax                      | 211,451       | 157,905       |
| Current tax charge (note 5b)      | 1,685,501     | 760,793       |
| Deferred tax (note 5c)            | (116,253)     | (125,104)     |
| Total tax charge for the year     | 1,569,248     | 635,689       |

## b) Factors affecting current tax charge for the year

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|   | 30.09.23<br>£ | 30.09.22<br>£ |
|---|---------------|---------------|
| Net revenue before taxation   | 9,763,744     | 4,752,212     |
| Corporation tax at 20%  | 1,952,749     | 950,442       |
| Effects of:   |               |               |
| Revenue not subject to taxation                                       | (604,979)     | (477,301)     |
| Overseas tax  | 211,451       | 157,905       |
| Realised gains on non-qualifying offshore funds                       | 133,595       | 133,863       |
| Double taxation relief  | (7,315)       | (4,116)       |
| Current tax charge (note 5a)  | 1,685,501     | 760,793       |
| c) Provision for deferred tax   |               |               |
| Provision at start of year  | 116,253       | 241,357       |
| Deferred tax credit in profit and loss account for the year (note 5a) | (116,253)     | (125,104)     |

#### d) Deferred tax

At the year end the fund had no surplus management expenses (30.09.21: £nil) and no deferred tax asset has been recognised.

Provision at end of year (note 5a)

116.253

#### 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

|   | 30.09.23    | 30.09.22    |
|---|-------------|-------------|
|   | £           | £           |
| First Interim                                   | 1,958,735   | 978,324     |
| Second Interim                                  | 2,363,844   | 1,215,831   |
| Third Interim                                   | 2,975,724   | 1,930,237   |
| Final   | 3,316,170   | 1,799,368   |
|   | 10,614,473  | 5,923,760   |
| Add: Amounts deducted on cancellation of shares | 144,298     | 94,233      |
| Deduct: Amounts received on issue of shares     | (478,368)   | (222,909)   |
| Net distribution for the year                   | 10,280,403  | 5,795,084   |
| Reconciliation of net distribution for          |             |             |
| the year to net revenue after tax:              |             |             |
| Net distribution for the year                   | 10,280,403  | 5,795,084   |
| Expenses allocated to Capital:                  |             |             |
| ACD's periodic charge                           | (2,364,862) | (1,920,925) |

| Shares cancelled                     | (147,484)         | (327,346)            | (21,042,151)      | (14,281,407)            |
| Shares converted                     | (12,076)          | (23,097)             | 842,334           | (683,966)               |
| Closing shares at 30.09.23           | 1,044,126         | 2,622,515            | 61,150,261        | 300,768,047             |

## 12 Related parties

ACD fees paid to Rathbons Asset Management Limited (the ACD) are disclosed in note 5 and amounts outstanding at the year end in note 10.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 8.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Total Return Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements.

At the year end there were no significant shareholders (30.09.22: nil).

#### 13 Shareholder funds

The fund has two share class: R-class and S-class. The annual ACD charge on the R-class is 1.50%, on the S-class 0.50%.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on pages 6 to 9.

## 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

The fund holds a number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on pages 11 to 15).

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilities will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|  | 30.09.23    | 30.09.22    |
|--|-------------|-------------|
|  | £           | £           |
| Currency:  |             |             |
| Australian dollar  | 494,500     | 9,701,652   |
| Canadian dollar  | _           | 11,066,555  |
| Danish krone   | (699)       | _           |
| Euro   | 2,631,091   | 1,757,847   |
| Hong Kong dollar   | 2,285,254   | 1,878,242   |
| Japanese yen   | _           | 18,604,468  |
| Swedish krona  | 3,022,500   | 1,591,022   |
| Swiss franc  | 4,441,721   | 4,407,997   |
| Singapore dollar   | 2,446,656   | _           |
| US dollar  | 83,222,985  | 58,507,219  |
| Pound sterling   | 433,594,784 | 282,957,822 |
|  | 532,138,792 | 390,472,824 |
| Other net liabilities not categorised as financial instruments | (638,931)   | (185,918)   |
| Net assets   | 531,499,861 | 390,286,906 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £8,958,546 (30.09.22: £9,774,091). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £10,949,334 (30.09.22: £11,946,111). These calculations assume all other variables remain constant.

 $The comparative figures have been \ restated \ to \ better \ reflect \ the \ currency \ hedging \ which \ reduces \ the \ currency \ exposure.$ 

(ii) Interest rate risk, being the risk that the value of investments will fluctuate as a result of interest rate charges.

#### 15 Risk disclosures on financial instruments (continued)

## (ii) Interest rate risk (continued)

If interest rates had increased by 1% as at the balance sheet date, the net asset value of the fund would have increased by £12.663.440 (30.09.22: £9.263.691). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the fund would have decreased by £12,663,440 (30.09.22: £9,263,691). These calculations assume all other variables remain constant.

The floating rate financial assets and liabilities comprise bank balances, floating rate securities and index linked bonds that earn or pay interest at rates linked to the UK base rate or its international equivalents.

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £49,422,797 (30.09.22: £36,221,104). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £49,422,797 (30.09.22: £36,221,104). These calculations assume all other variables remain constant.

- (iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to investment limits for issuers of securities and issuer credit ratings are evaluated periodically.
- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

Commissions and taxes as % of average net assets Commissions 0.01% Taxes 0.01%

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.25% (30.09.22: 0.29%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

The unadjusted quoted price in an active market for identical assets or liabilities that the Level 1 entity can access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. Level 3

## 18 Cross holdings

The Fund did not hold shares in any of the other Sub-Funds of Rathbones Multi-Asset Portfolio at the period end.

## 19 Post balance sheet event

Following a review of the R-class shares in the fund, these classes will be closed and holdings will be converted into other share classes within the fund which have a lower annual management charge. These conversions will take place on 25 January 2024. There will be no tax implications for investors from this conversion and although investors will receive a different number of shares in the new class, the value of their holding will remain the same following the conversion.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

Paid

## Investment objective and policy

### Investment objective

The objective of the fund is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +2%, after fees, over any rolling five-year period by investing with our Liquidity, Equitytype risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than half of the volatility of the FTSE Developed stock market Index

There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI +2% as a target for our fund's return because we aim to grow your investment above inflation. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

### Investment policy

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for the purpose of efficient portfolio management and hedging. The fund does not use derivatives for investment purposes. In the event the fund intends to use derivatives for investment purposes shareholders will be given 60 days notice.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

## Investment report for the year ended 30 September 2023

#### Performance

Over the year ended 30 September 2023, the Rathbone Defensive Growth Portfolio Fund (S-class shares) gained 4.5%. For the same period, the fund's UK CPI + 2% benchmark returned 8.8%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 52%. compared with a target of 50%.

### Portfolio activity

As bond yields kept rising around the world, we added to our holdings of the US Treasury 1.875% 2032, 3.5% 2033 and 2.5% 2024, and the UK Treasury 1.125% 2039 and 0.875% 2033. Even as we added to our government bond holdings overall, we took advantage of pretty significant fluctuations in yields throughout the period. This meant buying more when yields rose (i.e. when prices fell) and selling some of them as yields dropped (and prices rose). The largest of these trims was the UK Treasury 4.25% 2032.

In late 2022 we sold our Canadian Government 0.5% 2030 bonds because we preferred US Treasuries. Rates should be peaking soon, so we think it makes sense to add to safe-haven assets. to protect ourselves if yields fall suddenly, as they would if the world tumbles into recession. Government bond prices have been bouncing up and down a lot over the past six months as investors judge central bankers' fight against inflation and gauge the likelihood of recession. We've tried to take profits when prices are higher (and vields lower), and buy them back when prices are lower (yields higher).

Towards the end of the period, we started to lengthen the average maturity of our government bond portfolio, which has the effect of making the value of our bond exposure more sensitive to changes in prevailing yields. This meant we sold the US Treasury 2.5% 2024 and the UK Treasury 0.875% 2033 and bought bonds that mature further into the future.

Also, we sold alcoholic drinks conglomerate Diageo in the third quarter of 2023 because we felt smaller, more artisanal brands were better able to challenge its premium labels.

#### Market overview

Benchmark government bond yields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between, making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond yield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well – particularly stock markets.

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis – regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

Higher interest rates and bond yields mean that borrowing is harder to come by for households and businesses, and while this hasn't yet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, yields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

## Investment report for the year ended 30 September 2023 (continued)

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and ves. this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash. and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

David Coombs Lead Fund Manager 18 October 2023

Will McIntosh-Whyte Fund Manager

### Notes to the financial statements

### 1 Accounting policies

### a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the "revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014, and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

### b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

### d) Treatment of expenses

All expenses (other than the ACD charge and direct costs of purchase and sale of investments) are charged against revenue.

#### e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available. daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts. market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements.

#### 1 Accounting policies (continued)

### f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

### g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets. and liabilities are not discounted to reflect the time value of money.

### 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, the ACD's charge is charged to capital, offsetting expenses against capital may constrain future growth in revenue and capital.

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

## 3 Net capital gains/(losses)

<sup>\*</sup> Audit fees for 2023 are £10,000 excluding VAT (30.09.22: £9,433 excluding VAT).

### 6 Interest payable and similar charges

|                                      | 30.09.23<br>£ | 30.09.22<br>£ |
|--------------------------------------|---------------|---------------|
| Bank interest payable                | 1             | _             |
| Interest payable and similar charges | 1             | _             |

#### 7 Taxation

|   | 30.09.23<br>£ | 30.09.22<br>£ |
|---|---------------|---------------|
| a) Analysis of charge in the year       |               |               |
| Overseas tax                            | 318,206       | 155,911       |
| Corporate tax                           | 1,148,009     | 183,365       |
| Reclaimable tax written off             | _             | 427           |
| Double taxation relief                  | (15,978)      | (4,124)       |
| Total tax charge for the year (note 5b) | 1,450,237     | 335,579       |

### b) Factors affecting current tax charge for the year

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|                                 | 30.09.23<br>£ | 30.09.22<br>£ |
|---------------------------------|---------------|---------------|
| Net revenue before taxation     | 10,261,353    | 3,310,907     |
| Corporation tax at 20%          | 2,052,271     | 662,181       |
| Effects of:                     |               |               |
| Revenue not subject to taxation | (904,262)     | (478,816)     |
| Overseas tax                    | 318,206       | 155,911       |
| Double taxation relief          | (15,978)      | (4,124)       |
| Reclaimable tax written off     | _             | 427           |
| Corporate tax charge            | 1,450,237     | 335,579       |

### c) Deferred tax

At the year end the fund had no surplus management expenses (30.09.22: £nil) and no deferred tax asset has been recognised.

#### 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

|   | 30.09.23<br>f | 30.09.22<br>£ |
|---|---------------|---------------|
|   | ž.            |               |
| First Interim                                   | 1,350,578     | 604,351       |
| Second Interim                                  | 2,086,006     | 889,976       |
| Third Interim                                   | 3,839,088     | 1,239,110     |
| Final   | 5,216,818     | 1,411,359     |
|   | 12,492,490    | 4,144,796     |
| Add: Amounts deducted on cancellation of shares | 30,551        | 19,477        |
| Deduct: Amounts received on issue of shares     | (1,744,915)   | (187,818      |
| Net distribution for the year                   | 10,778,126    | 3,976,455     |

### 12 Related parties

ACD fees paid to Rathbones Asset Management Limited (the ACD) are disclosed in note 5 and amounts outstanding at the year end in note 10.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 8.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Defensive Growth Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements

At the year end there were no significant shareholders (30.09.22: nil).

### 13 Shareholder funds

The fund has one share class: S Class. The annual ACD charge on the fund is 0.50%.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on pages 39 and 40.

## 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

The fund holds a number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on pages 42 to 47).

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilties will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|  | 30.09.23    | 30.09.22    |
|--|-------------|-------------|
|  | £           | £           |
| Currency:  |             |             |
| Australian dollar  | 301,196     | 5,909,189   |
| Canadian dollar  | 7,724       | 6,323,746   |
| Danish krone   | 3,493,225   | 1,193,753   |
| Euro   | 5,383,086   | 769,760     |
| Hong Kong dollar   | 10,008,811  | 2,509,882   |
| Japanese yen   | 7,282,047   | 9,803,153   |
| Singapore dollar   | 5,506,996   | _           |
| Swedish krona  | 5,035,472   | 1,441,279   |
| Swiss franc  | 12,933,974  | 6,306,579   |
| US dollar  | 154,366,918 | 48,181,336  |
| Pound sterling   | 665,989,611 | 192,602,855 |
|  | 870,309,060 | 275,041,532 |
| Other net liabilities not categorised as financial instruments | (602,550)   | (118,362)   |
| Net assets   | 869,706,510 | 274,923,170 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £18,574,495 (30.09.22: £7,494,425). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £22,702,161 (30.09.22: £9,159,853). These calculations assume all other variables remain constant.

The comparative figures have been restated to better reflect the currency hedging which reduces the currency exposure.

(ii) Interest rate risk, being the risk that the value of investments will fluctuate as a result of interest rate charges.

#### 15 Risk disclosures on financial instruments (continued)

### (ii) Interest rate risk (continued)

If interest rates had increased by 1% as at the balance sheet date, the net asset value of the fund would have increased by £11.681.920 (30.09.22; £2.810.022). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the fund would have decreased by £11,681,920 (30.09.22: £2,810,022). These calculations assume all other variables remain constant.

The floating rate financial assets and liabilities comprise bank balances, floating rate securities and index linked bonds that earn or pay interest at rates linked to the UK base rate or its international equivalents.

| Bond credit ratings    | 30.09                   | 30.09.22                             |                         |                                      |

| Below investment grade | 6,418,469               | 0.74                                 | 10,018,659              | 3.64                                 |
| Unrated stocks***      | 13,293,727              | 1.53                                 | _                       | _                                    |
| Total Bonds            | 306,576,940             | 35.25                                | 93,309,799              | 33.95                                |

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £75,741,339 (30.09.22: £25,842,685). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £75,741,339 (30.09.22: £25.842.685). These calculations assume all other variables remain constant.

(iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to

- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet.
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

investment limits for issuers of securities and issuer credit ratings are evaluated periodically.

Commissions and taxes as % of average net assets Commissions 0.02% Taxes

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.20% (30.09.22:0.26%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

Level 1 The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Level 3 Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

## Investment objective and policy

### Investment objective

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +3%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI +3% as a target for our fund's return because we aim to grow vour investment above inflation.

We aim to deliver this return with no more than two-thirds of the volatility of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around two-thirds of that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk. our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

**Investment policy** 

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

## Investment report for the year ended 30 September 2023

#### **Performance**

Over the year ended 30 September 2023, the Rathbone Strategic Growth Portfolio Fund (S-class shares) gained 6.3%. For the same period, the fund's CPI + 3% benchmark returned 9.9%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 70%. slightly higher than its target of 66.7%.

### Portfolio activity

As bond yields kept rising around the world, we added to our holdings of the US Treasury 1.875% 2032, and the UK Treasury 1.125% 2039 and 0.875% 2033. Even as we added to our government bond holdings overall, we took advantage of pretty significant fluctuations in yields throughout the period. This meant buying more when yields rose (i.e. when prices fell) and selling some of them as yields dropped (and prices rose). The largest of these trims was the UK Treasury 0.875% 2033.

In late 2022 we sold our Canadian Government 0.5% 2030 bonds because we preferred US Treasuries. Rates should be peaking soon, so we think it makes sense to add to safe-haven assets to protect ourselves if yields fall suddenly, as they would if the world tumbles into recession. Government bond prices have been bouncing up and down a lot over the past six months as investors judge central bankers' fight against inflation and gauge the likelihood of recession. We've tried to take profits when prices are higher (and yields lower), and buy them back when prices are lower (yields higher).

Towards the end of the period, we started to lengthen the average maturity of our government bond portfolio, which has the effect of making the value of our bond exposure more sensitive to changes in prevailing yields. This meant we bought the UK Treasury 3.75% 2052.

In January we bought a new diversifier which takes advantage of an idiosyncratic feature of European equity option markets. Large Continental insurers are pressured by regulation to each week buy very short-dated put options – a kind of insurance contract on the stock index. This is to make sure that a big drop in stock markets doesn't wipe out the assets required to pay out their customers' insurance claims. As you can imagine, that creates

a huge amount of demand for short-dated put options, which (like anything) pushes up their price. The Bank of America European Catapult structured product sells these structurally overpriced put options and then uses half of the money it receives to simultaneously buy slightly longer-dated puts at keener prices. This strategy therefore makes money regardless of whether stock markets rise or fall because it simply pockets the difference between the two put prices. It should also make money if market volatility increases because it is 'long' the slightly-longer-dated put, and its value is more sensitive to changes in volatility because of its longer life. We could lose out, however, if markets fall gracefully - i.e. even as volatility drops (this can happen).

We sold American recycled decking supplier Trex because we felt its valuation had become unattractive. Another sale was biotech business Amgen. We swapped Amgen for US-listed pharmaceutical, veterinary medicine and vaccine manufacturer Merck. Merck's sales have grown steadily over many years and it sports exceptionally high gross profit margins (gross profit is revenue less the costs of production). The business should also be less susceptible to rising costs from inflation.

We trimmed the SPDR Russell 2000 US Small Cap ETF during the period to reduce our equity exposure.

#### Market overview

Benchmark government bond yields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between. making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond vield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well particularly stock markets.

## Investment report for the year ended 30 September 2023 (continued)

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis – regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

Higher interest rates and bond vields mean that borrowing is harder to come by for households and businesses, and while this hasn't vet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, vields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and yes, this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash, and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

David Coombs Lead Fund Manager 18 October 2023

Will McIntosh-Whyte Fund Manager

# Risk and reward profile

# Risk and reward profile as published in the fund's most recent Key Investor Information Document

Lower potential risk/reward (Not risk-free)

Higher potential risk/reward

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

## Notes to the financial statements

## 1 Accounting policies

## a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014, and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

## b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

## d) Treatment of expenses

All expenses (other than the ACD charge and direct costs of purchase and sale of investments) are charged against revenue.

#### e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available. daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts. market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements.

#### 1 Accounting policies (continued)

## f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

# g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

## 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, the ACD's charge is deducted from capital, offsetting expenses against capital may constrain future growth in revenue and capital.

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

There may be instances where marginal tax relief is due to/from revenue for the utilisation of allowable expense.

| Double taxation relief               | (80,411)  | (39,307)  |

## b) Factors affecting current tax charge for the year

Total tax charge for the year (note 5b)

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|   | 30.09.23    | 30.09.22    |
|---|-------------|-------------|
|   | £           | £           |
| Net revenue before taxation                     | 32,662,501  | 20,209,098  |
| Corporation tax at 20%                          | 6,532,500   | 4,041,820   |
| Effects of:                                     |             |             |
| Revenue not subject to taxation                 | (4,506,889) | (3,800,695) |
| Utilisation of excess management expenses       | _           | (428,750)   |
| Overseas tax                                    | 1,815,527   | 1,446,362   |
| Realised gains on non-qualifying offshore funds | _           | 445,558     |
| Double taxation relief                          | (80,411)    | (39,307)    |
| Total tax charge for the year (note 5a)         | 3,760,727   | 1,664,988   |
|   |             |             |

## c) Deferred tax

At 30 September 2023, there is no potential deferred tax asset (30.09.22: nil) in relation to surplus management expenses.

1,664,988

3.760.727

## 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

| Currentation of shares, and comprise.                                     |               |               |
|---|---------------|---------------|
|   | 30.09.23<br>£ | 30.09.22<br>£ |
| First Interim   | 6,944,061     | 4,284,987     |

## 12 Related parties

ACD fees paid to Rathbones Asset Management Limited (the ACD) are disclosed in note 5 and amounts outstanding at the year end in note 10.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 8.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Strategic Growth Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements.

At the year end there were no significant shareholders (30.09.22: nil).

### 13 Shareholder funds

The fund has two share classes: R-class and S-class. The annual ACD charge on R-class is 1.50%, and S-class is 0.50%.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on pages 68 to 71.

## 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

#### 15 Risk disclosures on financial instruments (continued)

The fund holds a number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on pages 73 to 77).

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilities will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|   | 30.09.23      | 30.09.22      |
|---|---------------|---------------|
|   | £             | £             |
| Currency:   |               |               |
| Australian dollar   | 1,213,773     | 23,813,148    |
| Canadian dollar   | 25,944        | 31,618,730    |
| Danish krone  | 11,951,595    | 7,781,503     |
| Euro  | 20,031,249    | 13,513,760    |
| Hong Kong dollar  | 31,964,336    | 25,771,951    |
| Japanese yen  | 46,358,362    | 65,368,071    |
| Norwegian krone   | 6,693,901     | 6,119,668     |
| Swedish krona   | 15,926,723    | 11,868,853    |
| Swiss franc   | 46,480,782    | 43,630,369    |
| US dollar   | 488,452,810   | 265,998,134   |
| Pound sterling  | 1,633,552,543 | 1,124,926,046 |
|   | 2,302,652,018 | 1,620,410,233 |
| Other net assets not categorised as financial instruments | 1,045,497     | 719,585       |
| Net assets  | 2,303,697,515 | 1,621,129,818 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £60,827,225 (30.09.22: £45,044,017). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £74,344,386 (30.09.22: £55.053.799). These calculations assume all other variables remain constant.

The comparative figures have been restated to better reflect the currency hedging which reduces the currency exposure.

(ii) Interest rate risk, being the risk that the value of investments will fluctuate as a result of interest rate charges. The table below shows the interest rate risk profile at the balance sheet date:

|                    | 30.09.23    |             |
|--------------------|-------------|-------------|

| Pound sterling  | (11,792,947)  | (3,131,550)   |  |
|   | (32,195,778)  | (39,172,567)  |  |
| Other net assets not categorised as financial instruments | 1,045,497     | 719,585       |  |
| Net assets  | 2,303,697,515 | 1,621,129,818 |  |

If interest rates had increased by 1% as at the balance sheet date, the net asset value of the fund would have increased by £34,201,881 (30.09.22: £15,127,034). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the fund would have decreased by £34,201,881 (30.09.22: £15,127,034). These calculations assume all other variables remain constant.

#### 15 Risk disclosures on financial instruments (continued)

### (ii) Interest rate risk (continued)

The floating rate financial assets and liabilities comprise bank balances, floating rate securities and index linked bonds that earn or pay interest at rates linked to the UK base rate or its international equivalents.

| Total Bonds            | 650,772,945        | 28.25                      | 272,273,928        | 16.80                   |

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £221,097,730 (30.09.22: £149,451,299). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £221,097,730 (30.09.22: £149,451,299). These calculations assume all other variables remain constant.

- (iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to investment limits for issuers of securities and issuer credit ratings are evaluated periodically.
- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet.
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

| commission and taxes  | 471,104,177 |         |          |       |       |

The fund had paid nil as commission on purchases and sale derivative transactions for the year ended 30.09.22.

Commissions and taxes as % of average net assets Commissions 0.02% Taxes 0.02%

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.22% (30.09.22: 0.28%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

The unadjusted quoted price in an active market for identical assets or liabilities that the entity can Level 1 access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.

Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. Level 3

## 18 Cross holdings

The fund did not hold shares in any of the other sub-funds of Rathbones Multi-Asset Portfolio at the period end.

## 19 Post balance sheet event

Following a review of the R-class shares in the fund, these classes will be closed and holdings will be converted into other share classes within the fund which have a lower annual management charge. These conversions will take place on 25 January 2024. There will be no tax implications for investors from this conversion and although investors will receive a different number of shares in the new class, the value of their holding will remain the same following the conversion.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# Investment objective and policy

## Investment objective

We aim to deliver an income of 3% or more each vear. We also aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +3%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI +3% as a target for our fund's return because we aim to grow your investment above inflation.

We aim to deliver this return with no more than two-thirds of the volatility of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around two-thirds of that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

Investment policy

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

# Investment report for the year ended 30 September 2023

#### Performance

Over the year ended 30 September 2023, the Rathbone Strategic Income Portfolio Fund (S-class shares) gained 6.5%. For the same period, the fund's CPI + 3% benchmark returned 9.9%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 59%, compared with a target of 67%.

## Portfolio activity

We sold UK oil and gas major BP in late 2022 because we believed there were better opportunities elsewhere. We had bolstered our oil and gas exposure by purchasing BP in addition to our other majors as the energy crisis got going in mid to late 2021. We used the cash to start increasing our holdings of bonds. This sounds pretty boring. but it's quite a significant occurrence! Since we launched our fund seven years ago, this is the first time that we had sold stocks and bought corporate bonds because the yields were more attractive in fixed income. It just shows how much the financial world shifted in 2022.

As bond yields kept rising around the world, we added significantly to our government bond holdings. These included the US Treasury 4.5% 2036. and the UK Treasury 5% 2025, 4.25% 2027 and 4.5% 2042. Towards the end of the period, we started to lengthen the average maturity of our government bond portfolio, which has the effect of making the value of our bond exposure more sensitive to changes in prevailing yields. This meant we bought the UK Treasury 3.75% 2052.

With global inflation appearing to peak in the first half of the period, we reduced iron miner and aluminium smelter Rio Tinto. In the first quarter of 2023, we took profits in drinks carton manufacturer SIG Combibloc and credit card and payments network Discover after they both enjoyed gains.

Also, we sold alcoholic drinks conglomerate Diageo in the third quarter of 2023 because we felt smaller, more artisanal brands were better able to challenge its premium labels.

#### Market overview

Benchmark government bond yields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between, making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond yield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well particularly stock markets.

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis – regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

Higher interest rates and bond yields mean that borrowing is harder to come by for households and businesses, and while this hasn't yet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, yields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

# Investment report for the year ended 30 September 2023 (continued)

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and ves. this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash. and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

David Coombs Lead Fund Manager 18 October 2023

<sup>\*\*</sup> The Operating charges are represented by the Ongoing Charges Figure (OCF) which is calculated in line with the IA SORP and includes a synthetic element relating to the expenses paid by any investment funds which the fund holds.

<sup>\*\*\*</sup> These prices may have been calculated on a different basis to the opening/closing net asset value per share shown in the comparative table, this may result in the opening/closing net asset value per share being higher or lower than the published highest or lowest prices for the period.

# Risk and reward profile

# Risk and reward profile as published in the fund's most recent Key Investor Information Document

Lower potential risk/reward (Not risk-free)

Higher potential risk/reward

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

# Discrete annual performance

## Discrete annual performance, year ending 30 September 2023

|                             | 2019  | 2020   | 2021   | 2022   | 2023  |
|-----------------------------|-------|--------|--------|--------|-------|
| S-class shares              | 5.88% | -3.53% | 12.45% | -8.63% | 6.48% |
| UK Consumer Price Index +3% | 4.83% | 3.20%  | 6.32%  | 13.11% | 9.86% |

Source performance data FE fundinfo, mid to mid, net income reinvested.

Past performance should not be seen as an indication of future performance.

The value of investments and the income from them may go down as well as up and you may not get back your original investment.

## Notes to the financial statements

#### 1 Accounting policies

## a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014. and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

#### b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

## d) Treatment of expenses All fees are charged to capital.

## e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available, daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts, market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements.

#### 1 Accounting policies (continued)

#### f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

## g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

#### 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, all fees (net of any tax relief) after all fees. Charged to capital, offsetting expenses against capital may constrain future growth in revenue and capital.

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

There may be instances where marginal tax relief is due to/from revenue for the utilisation of allowable expense.

| Corporate tax                           | 307,005       | 101,307  |  |
| Overseas tax                            | 98,718        | 74,793   |  |
| Reclaimable tax written off             | _             | 902      |  |
| Double taxation relief                  | (3,353)       | _        |  |
| Total tax charge for the year (note 5b) | 402,370       | 177,002  |  |

## b) Factors affecting current tax charge for the year

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|                             | 30.09.23  | 30.09.22  |
|-----------------------------|-----------|-----------|
|                             | £         | £         |
| Net revenue before taxation | 3,436,154 | 2,249,041 |
| Corporation tax at 20%      | 687,231   | 449,808   |
| Effects of:                 |           |           |
| Exempt dividend income      | (380,226) | (348,501) |
| Overseas tax                | 98,718    | 74,793    |
| Reclaimable tax written off | _         | 902       |
| Double taxation relief      | (3,353)   | _         |
| Corporate tax charge        | 402,370   | 177,002   |
|                             |           |           |

#### c) Deferred tax

At the year end the fund had no surplus management expenses (30.09.22: £nil) and no deferred tax asset has been recognised.

#### 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

|  | 30.09.23<br>£ | 30.09.22<br>£ |
|--|---------------|---------------|
| Interim  | 3,193,967     | 2,508,928     |
| Final  | 1,170,832     | 726,596       |
|  | 4,364,799     | 3,235,524     |
| Add: Amounts deducted on cancellation of shares              | 33,018        | 31,551        |
| Deduct: Amounts received on issue of shares                  | (152,318)     | (83,115)      |
| Net distribution for the year                                | 4,245,499     | 3,183,960     |
| Reconciliation of net distribution for                       |               |               |
| the year to net revenue after tax:                           | 4 345 400     | 2 102 000     |
| Net distribution for the year Expenses allocated to Capital: | 4,245,499     | 3,183,960     |

| Closing shares at 30.09.23           | 96,110,778        | 16,623,440              |

## 12 Related parties

ACD fees paid to Rathbones Asset Management Limited (the ACD) are disclosed in note 5 and amounts outstanding at the year end in note 9.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 7.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Strategic Income Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements.

At the year end there were no significant shareholders (30.09.22: nil).

#### 13 Shareholder funds

The fund has one share class: S-class. The annual ACD charge on the fund is 0.50%.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on pages 100 to 101.

## 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

The fund holds a number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on pages 103 to 107).

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilities will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|   | 30.09.23    | 30.09.22   |
|---|-------------|------------|
|   | £           | £          |
| Currency:   |             |            |
| Australian dollar   | 74,601      | 125,209    |
| Danish krone  | 347,107     | 265,279    |
| Euro  | 974,462     | 40,431     |
| Hong Kong dollar  | 916,728     | 999,889    |
| Singapore dollar  | 1,025,496   | 929,565    |
| Swedish krona   | 627,927     | 595,570    |
| Swiss franc   | 3,307,886   | 3,500,217  |
| US dollar   | 18,252,429  | 1,429,135  |
| Pound sterling  | 98,571,797  | 85,409,874 |
|   | 124,098,433 | 93,295,169 |
| Other net assets not categorised as financial instruments | 69,164      | 35,295     |
| Net assets  | 124,167,597 | 93,330,464 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £2,320,603 (30.09.22: £716,845). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £2,836,293 (30.09.22: £876,144). These calculations assume all other variables remain constant.

The comparative figures have been restated to better reflect the currency hedging which reduces the currency exposure.

### 15 Risk disclosures on financial instruments (continued)

## (ii) Interest rate risk (continued)

If interest rates had increased by 1% as at the balance sheet date, the net asset value of the fund would have increased by £2.870.073 (30.09.22: £1.803.366). If interest rates had decreased by 1% as at the balance sheet date, the net asset value of the fund would have decreased by £2,870,073 (30.09.22: £1,803,366). These calculations assume all other variables remain constant.

The floating rate financial assets and liabilities comprise bank balances, floating rate securities and index linked bonds that earn or pay interest at rates linked to the UK base rate or its international equivalents.

| Total Bonds            | 49,648,973         | 39.97                      | 31,832,529         | 34.11                      |

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £11,869,064 (30.09.22: £9,020,932). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £11,869,064 (30.09.22: £9,020,932). These calculations assume all other variables remain constant.

- (iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to investment limits for issuers of securities and issuer credit ratings are evaluated periodically.
- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

Commissions and taxes as % of average net assets Commissions 0.01% Taxes 0.02%

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.22% (30.09.22: 0.34%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

Level 1 The unadjusted quoted price in an active market for identical assets or liabilities that the

entity can access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed

using market data) for the asset or liability, either directly or indirectly.

Level 3 Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# Investment objective and policy

### Investment objective

The objective of the fund is to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation +4%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. The fund aims to deliver this return with no more than fivesixths of the volatility of the FTSE Developed stock market Index

There is no guarantee that this investment objective will be achieved over five years, or any other time period.

We use the CPI +4% as a target for our fund's return because we aim to grow your investment considerably above inflation. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

## Investment policy

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for the purpose of efficient portfolio management and hedging. The fund does not use derivatives for investment purposes. In the event the fund intends to use derivatives for investment purposes shareholders will be given 60 days notice.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

# Investment report for the year ended 30 September 2023

#### **Performance**

Over the year ended 30 September 2023, the Rathbone Dynamic Growth Portfolio Fund (S-class shares) gained 8.9%. For the same period, the fund's UK CPI + 4% benchmark returned 10.9%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 81%, compared with a target of 83%.

#### Portfolio activity

As bond yields kept rising around the world, we added to our holdings of the US Treasury 3.5% 2033 and 5.25% 2028 and the UK Treasury 1.125% 2039 and 0.875% 2033. Even as we added to our government bond holdings overall, we took advantage of pretty significant fluctuations in yields throughout the period. This meant buying more when yields rose (i.e. when prices fell) and selling some of them as yields dropped (and prices rose). The largest of these trims was the US Treasury 5.25% 2028.

We also bought US Treasury Inflation-Protected Securities (TIPS) 0.125% 2031 bonds during the period. The capital and coupon payments of these bonds rise along with the rate of inflation. We bought TIPS because we felt the US 'breakeven' rate looked attractive. The 'breakeven' is the average inflation rate that would mean an inflationprotected bond would deliver the same return as a conventional bond that matured at the same time. In plain English, we believed the price of US TIPS was underestimating the average rate of inflation.

Towards the end of the period, we started to lengthen the average maturity of our government bond portfolio, which has the effect of making the value of our bond exposure more sensitive to changes in prevailing yields. This meant we bought the UK Treasury 1.5% 2053.

Another effect of higher interest rates is that it makes structured products cheaper. These investments are contracts with investment banks that pay specific returns when triggered by certain scenarios. We bought the Morgan Stanley FTSE 100/S&P 500 13.15% Flat Autocall which pays a 13.15% coupon and gives us our capital back if, in a

year's time, both the US and UK stock markets are above the level at which we bought in. If one or both are in the red, the autocall doesn't pay out but rolls the coupon payment into the next year. This continues until both indices finish a year above their trigger levels or the contract reaches its final maturity in 2028. If in five years' time both indices haven't fallen below where they started, then we are paid 65.75% (13.15% for each year) and our capital is returned. However, if one or both indices has fallen more than 25% then we suffer capital losses in line with the market. If the worst-performing index has dropped by less than 25% we get our capital back only. This sounds complicated, but the point of the investment is that it locks in a high annualised return if markets don't fall precipitously and stay there. In return, we give up any stock market returns above our 13.15% payoff. We believe this is a good way to make returns while reducing risk.

In the aftermath of the blow-up in several smaller US lenders in March, we sold Jack Henry. which supplies regional American banks with customer-facing software and apps and back-office management systems. While the turmoil in smaller US lenders has cooled massively since March when several businesses went bust, we think their profits will be squeezed in coming years. Smaller banks will need to offer depositors higher interest rates to entice them to stick around, while lots of the banks' money remains locked up in loans made in the past 10 years at very low rates. That means higher expenses and stagnant revenue (particularly if much higher rates reduce demand for more loans). In this environment, banks may start to curtail spending on upgrading systems and apps, which would hurt Jack Henry.

We sold alcoholic drinks conglomerate Diageo in the quarter because we felt smaller, more artisanal brands were becoming better able to challenge its premium labels. We also sold American recycled decking supplier Trex because we felt its valuation had become unattractive.

The oil price went on a roller coaster over the period. We took advantage of some of its spikes to take profits from our S&P 500 Energy Sector ETF.

# Investment report for the year ended 30 September 2023 (continued)

#### Market overview

Benchmark government bond yields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between, making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond yield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well particularly stock markets.

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis – regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

Higher interest rates and bond yields mean that borrowing is harder to come by for households and businesses, and while this hasn't vet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, vields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and yes, this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash. and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

# Risk and reward profile

## Risk and reward profile as published in the fund's most recent Key Investor Information Document

Lower potential risk/reward (Not risk-free)

Higher potential risk/reward

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

# Discrete annual performance

## Notes to the financial statements

#### 1 Accounting policies

## a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014, and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

## b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

## d) Treatment of expenses

All expenses (other than the ACD charge and direct costs of purchase and sale of investments) are charged against revenue.

#### e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available. daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts. market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements.

#### 1 Accounting policies (continued)

## f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

#### g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

## 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, the ACD's charge is deducted from capital, offsetting expenses against capital may constrain future growth in revenue and capital.

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

There may be instances where marginal tax relief is due to/from revenue for the utilisation of allowable expense.

| Interest payable and similar charges | (2)      | _        |

#### 7 Taxation

|   | 30.09.23 | 30.09.22 |
|---|----------|----------|
|   | £        | £        |
| a) Analysis of charge in the year       |          |          |
| Corporate tax                           | 110,698  | _        |
| Overseas tax                            | 237,446  | 133,092  |
| Double taxation relief                  | (10,488) | _        |
| Total tax charge for the year (note 5b) | 337,656  | 133,092  |

#### b) Factors affecting current tax charge for the year

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|   | *             |               |
|---|---------------|---------------|
|   | 30.09.23<br>£ | 30.09.22<br>£ |
| Net revenue before taxation             | 3,606,865     | 1,635,987     |
| Corporation tax at 20%                  | 721,373       | 327,197       |
| Effects of:                             |               |               |
| Revenue not subject to taxation         | (567,502)     | (351,422)     |
| Excess management expenses not utilised | (43,173)      | 24,795        |
| Tax relief on overseas tax suffered     | _             | (570)         |
| Overseas tax                            | 237,446       | 133,092       |
| Double taxation relief                  | (10,488)      | _             |
| Corporate tax charge                    | 337,656       | 133,092       |
|   |               |               |

#### c) Deferred tax

At 30 September 2023 there is no unrecognised deferred tax asset (30.09.22: £43,173) in relation to surplus management expenses.

#### 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

| caricenation of snares, and comprise.                |               |               |
|--|---------------|---------------|
|  | 30.09.23<br>£ | 30.09.22<br>£ |
| First Interim  | 576,056       | 327,033       |

#### 12 Related parties

ACD fees paid to Rathbones Asset Management Limited (the ACD) are disclosed in note 5 and amounts prepaid / outstanding at the year end in note 10.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 8.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Dynamic Growth Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements.

At the year end there were no significant shareholders (30.09.22: nil).

#### 13 Shareholder funds

The fund has one share class: S-Class. The annual ACD charge on the fund is 0.50%.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on pages 130 and 131.

#### 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

The fund holds a substantial number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on pages 133 to 137).

#### 15 Risk disclosures on financial instruments (continued)

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilities will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|   | 30.09.23    | 30.09.22    |
|---|-------------|-------------|
|   | £           | £           |
| Currency:   |             |             |
| Canadian dollar   | 4,627       | _           |
| Danish krone  | 1,997,332   | 886,664     |
| Euro  | 4,067,143   | 1,219,530   |
| Hong Kong dollar  | 5,585,992   | 2,764,105   |
| Japanese yen  | 9,090,927   | 5,042,599   |
| Norwegian krone   | 1,234,424   | 752,703     |
| Swedish krona   | 2,847,859   | 1,098,580   |
| Swiss franc   | 6,881,009   | 4,203,077   |
| US dollar   | 92,679,022  | 23,824,334  |
| Pound sterling  | 222,038,622 | 96,226,428  |
|   | 346,426,957 | 136,018,020 |
| Other net (liabilities)/assets not categorised as financial instruments | (25,296)    | 40,412      |
| Net assets  | 346,401,661 | 136,058,432 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £11,308,030 (30.09.22: £3,617,417). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £13,820,926 (30.09.22: £4,421,288). These calculations assume all other variables remain constant.

The comparative figures have been restated to better reflect the currency hedging which reduces the currency exposure.

## **15 Risk disclosures on financial instruments** (continued)

(ii) Interest rate risk, being the risk that the value of investments will fluctuate as a result of interest rate charges.

The table below shows the interest rate risk profile at the balance sheet date:

|   | 30.09.23               | 30.09.22             |

| ts 34   | 46,401,661             | 136,058,432          |

Due to the proportion of interest bearing assets held within the portfolio, no sensitivity analysis has been prepared illustrating the impact changes in yields would have on the value of the fund's portfolio.

#### 15 Risk disclosures on financial instruments (continued)

#### (ii) Interest rate risk (continued)

The floating rate financial assets and liabilities comprise bank balances, floating rate securities and index linked bonds that earn or pay interest at rates linked to the UK base rate or its international equivalents.

|   | <b>30.09.23</b> 30.09.                |                                      | 22                          |                                |  |

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £30,791,990 (30.09.22: £12,702,457). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £30,791,990 (30,09,22: £12.702.457). These calculations assume all other variables remain constant.

- (iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to investment limits for issuers of securities and issuer credit ratings are evaluated periodically.
- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet.
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

| Total sales including |            |       |          |     |     |
| transaction costs     | 21,713,080 | 6,017 |          | 201 |     |
| Total sales net of    |            |       |          |     |     |
| commission and taxes  | 21,706,862 |       |          |     |     |

The fund had paid £nil as commission on purchases and sale derivative transactions for the period ended 30.09.22.

| Commissions and taxes as % of average net assets |       |
|--|-------|
| Commissions                                      | 0.03% |
| Taxes  | 0.02% |

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.20% (30.09.22: 0.31%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

Level 1 The unadjusted quoted price in an active market for identical assets or liabilities that the

entity can access at the measurement date.

Level 2 Inputs other than quoted prices included within Level 1 that are observable (i.e. developed

using market data) for the asset or liability, either directly or indirectly.

Level 3 Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# Investment objective and policy

## Investment objective

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation. +5%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI +5% as a target for our fund's return because we aim to grow your investment significantly above inflation.

We aim to deliver this return with no more volatility than that of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

Investment policy

To meet the objective, the fund manager will invest globally in government and corporate bonds with no restriction on their credit quality, equities, collective investment schemes and structured products.

Up to 10% of the fund can be invested directly in contingent convertible bonds.

Derivatives may be used by the fund for investment purposes, efficient portfolio management and hedging. The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

The fund manager defines restrictions on how much of the fund can be invested in different types of assets based on the LED Framework. The restrictions are set at the discretion of the fund manager and will change over time. The restrictions are reviewed annually and in response to market events. Further details in relation to the current restrictions may be obtained by contacting Rathbones Asset Management Limited.

The manager may use all investment powers as permitted by the prospectus, outside the ranges described above, to ensure the fund is managed in the best interest of investors in times of market irregularities or stress.

The fund may invest at the fund manager's discretion in other transferable securities, money market instruments, warrants, cash and near cash and deposits and shares in collective investment schemes. Use may be made of stock lending, borrowing, cash holdings, hedging and other investment techniques permitted by the FCA Rules.

# Investment report for the year ended 30 September 2023

#### Performance

Over the year ended 30 September 2023, the Rathbone Enhanced Growth Portfolio Fund (S-class shares) gained 11.0%. For the same period, the fund's CPI + 5% benchmark returned 12%. The portfolio's three-year volatility as a percentage of the FTSE Developed global stock market index was 99%. compared with a target of 100%.

#### Portfolio activity

Interest rates and bond yields have continued to rise around the world. An effect of this is that it makes structured products cheaper. These investments are contracts with investment banks that pay specific returns when triggered by certain scenarios. We bought the Morgan Stanley FTSE 100/S&P 500 13.15% Flat Autocall which pays a 13.15% coupon and gives us our capital back if, in a year's time, both the US and UK stock markets are above the level at which we bought in. If one or both are in the red. the autocall doesn't pay out but rolls the coupon payment into the next year. This continues until both indices finish a year above their trigger levels or the contract reaches its final maturity in 2028. If in five years' time both indices haven't fallen below where they started, then we are paid 65.75% (13.15% for each year) and our capital is returned. However, if one or both indices has fallen more than 25% then we suffer capital losses in line with the market. If the worst-performing index has dropped by less than 25% we get our capital back only. This sounds complicated, but the point of the investment is that it locks in a high annualised return if markets don't fall precipitously and stay there. In return, we give up any stock market returns above our 13.15% payoff. We believe this is a good way to make returns while reducing risk.

In the first quarter of 2023, we bought Waste Management, the largest listed rubbish and recycling contractor in the US. There are only a few truly national players in the US waste market, with high barriers for would-be rivals to get into the business. Waste Management's contractual cash flows are highly reliable and sales growth tends to be forecast with strong accuracy because of this. Despite its incumbent advantages, Waste Management is investing significantly in its recycling technology

and it has a growing focus on finding ways to re-use waste rather than sending everything to landfill. It is working with large consumer brands to better address the issues of plastic waste, using big data to help them create circular economies for their products. Its management team is also thinking outside the box: the gas created by the decomposition of landfill at 124 of its sites is being harvested and used to generate power that is sold to the energy grid. The scheme is generating 600 megawatts of renewable energy annually, enough to power 400,000 homes.

With global inflation appearing to peak in the first half of the period, we reduced iron miner and aluminium smelter Rio Tinto. Also, we sold American recycled decking supplier Trex because we felt its valuation had become unattractive.

In the aftermath of the blow-up in several smaller US lenders in March, we sold Jack Henry. which supplies regional American banks with customer-facing software and apps and back-office management systems. While the turmoil in smaller US lenders has cooled massively since March when several businesses went bust, we think their profits will be squeezed in coming years. Smaller banks will need to offer depositors higher interest rates to entice them to stick around, while lots of the banks' money remains locked up in loans made in the past 10 years at very low rates. That means higher expenses and stagnant revenue (particularly if much higher rates reduce demand for more loans). In this environment, banks may start to curtail spending on upgrading systems and apps, which would hurt Jack Henry.

We sold New York-based services website design and hosting business Squarespace during the third quarter of 2023. Competition for its business seems to be heating up, with plenty of rivals offering similar services. We were concerned that it may be harder for the company to grow in a more crowded space, so we took the opportunity to sell as its share price has risen well so far this year.

We have a few medical technology companies throughout our funds, as we think they offer solutions to many health problems that will proliferate as the world's population becomes older and wealthier. We added two this year.

# Investment report for the year ended 30 September 2023 (continued)

Boston Scientific is best known for creating small steel-latticed tubes (stents) coated in a drug to unclog arteries and keep them free of plaque. However, it has many other products that help doctors care for patients with all sorts of other blockages, as well as tools for operations and general health monitoring. Boston Scientific's latest success is its Watchman device. With more than a passing resemblance to a metal iellyfish, the Watchman is inserted into a chamber of the heart to reduce the chance of blood-clot strokes for people with an irregular heartbeat. Sales of it have grown rapidly over the past few years, yet there is a chance that that could slow as competitors finally come to the market. Boston Scientific hasn't been resting on its laurels though and is finalising an updated design. We think, with populations ageing, there should be more than enough business in keeping older people with heart conditions healthy for Boston Scientific to keep growing.

The second medtech addition was German vaccine and drug manufacturing equipment maker Sartorius Stedim Biotech. Sartorius should be a long-term beneficiary of multi-year vaccination programmes and a shift in its drug manufacturing technology that allows for much faster implementation and scaling of capacity. In fact, we believe it's safe to say we wouldn't have had COVID vaccines produced so quickly without Sartorius.

Earlier this year I (fund manager Will McIntosh-Whyte) took a trip to the US to research companies and kick the tyres on how the economy was faring. While there I met McDonald's, a business that impressed me with its strategy and potential. The fast-food giant has had huge success over almost 70 years with franchising its business (selling the right to operate restaurants to independent operators). It still runs about 2.700 centrally, but 35,000 are franchised and there has been a clear move over the last few years to increase this number further – and its profit margins with it. McDonald's has dominated the world through supreme efficiency, a laser focus on costs and cashflow, and the golden arches themselves: a brand instantly recognisable anywhere in the world. The company is currently rolling out its 'Accelerating the Arches' strategy, focusing on its core: burgers, chicken and coffee (it's the second-biggest seller of coffee

in the US); and doubling down on the 4Ds: drivethrough (this remains the biggest channel in the US), development of sites, delivery, and digital. We think it still has plenty of potential to grow, so we bought shares when its valuation fell back in the third quarter of 2023.

The oil price went on a roller coaster over the period. We took advantage of some of its spikes to take profits from our S&P 500 Energy Sector ETF.

#### Market overview

Benchmark government bond vields have continued to rise over the past year to 30 September. In the US, the 10-year treasury has increased by roughly 1 percentage point to 4.65%, while its British counterpart is up a bit less to the same level.

It's not just the upward move, either. Government bonds have been extremely volatile in between, making for unsettling months of whipsawing fortunes. These are big moves for government borrowing markets, which are the bedrock for all longer-term interest rates in the economy. When a household or company wants a loan, a bank will take the long-term bond yield and then add a percentage on top to account for the risk of default and to make a profit. This means bond market moves are very consequential for economies and can cause a lot of volatility for other assets as well particularly stock markets.

Large movements in bond prices (which move in the opposite direction to yields) upended several banks back in March 2023 as they lost a lot of money on long-term bonds they had bought with their spare cash. Thankfully, this didn't spark a wider financial crisis – regulation of lenders is much tighter than previous decades, which has made the global banking system much more resilient.

Higher interest rates and bond yields mean that borrowing is harder to come by for households and businesses, and while this hasn't yet seemed to hold back spending by either camp, we think it's only a matter of time. Despite this bummer, there is a good story to tell about higher interest rates: in the days of ultra-low interest rates, yields on investments were extremely miserly. Nowadays investors are now paid much better for the risks they take in many assets.

# Investment report for the year ended 30 September 2023 (continued)

While we're pretty cautious about what the future will bring, we're holding much less cash than we have over the past decade. A return to normal interest rates (and ves. this is normal – the last 15 years were not!) has created opportunities in all sorts of places, and our portfolio has changed because of it. We now hold less equities, less cash. and more bonds in our portfolio. Today, we have more government bonds than ever before. We also own a sizeable chunk of structured products and have started investing in infrastructure for the first time (barring an investment in US oil pipelines several years back).

This is exciting. Proper multi-asset portfolios are back on the table! Zero-interest-rate policy pushed the prices of all types of assets higher and higher, squeezing our options. Now that interest rates are much higher, we can buy government bonds that offer yields and portfolio protection. We can find corporate bonds that pay large incomes to compensate for the risks they present. And we can scoop up out-of-favour investments with generous margins of safety.

David Coombs Lead Fund Manager 18 October 2023

Will McIntosh-Whyte Fund Manager

<sup>\*\*\*</sup> These prices may have been calculated on a different basis to the opening/closing net asset value per share shown in the comparative table, this may result in the opening/closing net asset value per share being higher or lower than the published highest or lowest prices for the period.

# Risk and reward profile

## Risk and reward profile as published in the fund's most recent Key Investor Information Document

Lower potential risk/reward (Not risk-free)

Higher potential risk/reward

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

# Discrete annual performance

#### Discrete annual performance, year ending 30 September 2023

|                             | 2019  | 2020  | 2021   | 2022    | 2023   |
|-----------------------------|-------|-------|--------|---------|--------|
|                             | 2015  | 2020  | 2021   | 2022    |        |
| R-class shares              | 4.35% | 3.44% | 20.66% | -15.46% | 9.88%  |
| S-class shares              | 5.05% | 4.49% | 21.87% | -14.60% | 10.99% |
| UK Consumer Price Index +5% | 6.86% | 5.21% | 8.38%  | 15.30%  | 11.99% |

Source performance data FE fundinfo, mid to mid, net income reinvested.

Past performance should not be seen as an indication of future performance.

The value of investments and the income from them may go down as well as up and you may not get back your original investment.

## Notes to the financial statements

#### 1 Accounting policies

#### a) Basis of accounting

The annual financial statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with FRS 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' and the Statement of Recommended Practice (SORP) for Financial Statements of UK Authorised Funds issued by The Investment Association in May 2014, and as amended in June 2017.

As stated in the Statement of the ACD's responsibilities in relation to the report and the financial statements of the Company on page 185, the ACD continues to adopt the going concern basis in the preparation of the financial statements of the fund

There are no significant judgments or sources of estimation uncertainty.

#### b) Recognition of revenue

All dividends (including distributions from collective investment schemes) on investments marked ex-dividend up to the accounting date are included in revenue inclusive of any tax deducted at source and net of attributable tax credits. Bank and other interest receivable is accrued up to the accounting date, and this forms part of the distribution.

Revenue on debt securities has been accounted for on an effective interest method

Revenue received from investments in authorised collective investment schemes, which are purchased during the financial year, will include an element of equalisation which represents the average amount of revenue included in the price paid for shares or units. The equalisation is treated as capital and deducted from the cost of the investment.

c) Treatment of scrip and special dividends Any stock received in lieu of cash dividends is credited to capital in the first instance, followed by a transfer to revenue of the cash equivalent being offered, and this forms part of the distribution made by the fund.

Special dividends are treated as revenue or capital depending on the facts of each particular case.

#### d) Treatment of expenses

All expenses (other than direct costs of purchase and sale of investments) are charged against revenue.

#### e) Basis of valuation of investments

The quoted investments of the fund have been valued at the closing bid-market prices excluding any accrued interest in the case of debt securities ruling on the principal markets on which the stocks are quoted on the last business day of the accounting year.

If the Stock Exchange quotation of an investment has been suspended, and in the opinion of the ACD it is unlikely to be reinstated, this has been indicated in the portfolio of investments. Suspended investments are valued based on the latest financial. statements of the respective company and agreed with the Depositary.

Level 1 structured products are valued daily based upon available market data. For Level 3 structured products where no market price is readily available. daily valuations are obtained from the issuer of the product, via consulting brokers Atlantic House or Fortum Capital. These prices are issuers' quotes and are not resulting from active trading activity. These structures are bespoke to Rathbones Asset Management. We use Markit Valuations Limited as an independent provider to verify the issuer price on a daily basis. Valuations are verified utilising the agreed pricing models within the relevant structured product's prospectus and where applicable pricing supplements. Where prices are outside our accepted tolerance, they are verified with Atlantic House/ Fortem Capital and Markit Valuations Limited. On a quarterly basis Rathbone Asset Management Fair Value Pricing Committee review the daily checks that were performed during the previous quarter to ensure the prices used reflected fair value.

Authorised collective investment schemes are valued at the bid price for dual price funds and at the quoted price for single price funds.

During the year the fund entered into derivative transactions in the form of forward foreign currency contracts. For forward foreign currency contracts, market value is determined by reference to forward currency exchange rates at the year end.

All assets are recognised and derecognised on trade date. Any trades occurring between valuation point and close of business are included in the financial statements

#### 1 Accounting policies (continued)

## f) Exchange rates

The functional currency of the fund is pound sterling. Transactions in foreign currencies are recorded in sterling at the rate ruling at the date of the transactions. Assets and liabilities expressed in foreign currencies at the end of the accounting year are translated into sterling at the closing middle exchange rates ruling on that date.

#### g) Taxation/Deferred tax

- i) Corporation tax is provided for at 20% on taxable revenue, after deduction of expenses.
- ii) Where overseas tax has been deducted from taxable overseas revenue, that tax can, in some instances, be set off against the corporation tax payable by the fund, by way of double taxation relief.
- iii) The charge for deferred tax is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax assets can be offset. Deferred tax assets and liabilities are not discounted to reflect the time value of money.

#### 2 Distribution policy

Revenue arising from the fund's investments accumulates during each accounting period. If, at the end of the accounting period, revenue exceeds expenses, the net revenue of the fund is available to be distributed to shareholders

For the purpose of calculating the distribution available to shareholders, revenue on debt securities is computed as the higher of the amount determined on an accrual of coupon basis and on an effective yield basis. A reconciliation of the net distribution to the net revenue of the fund as reported total return is shown in note 8.

In order to conduct a controlled dividend flow to shareholders, interim distributions will be made at the ACD's discretion, up to a maximum of the distributable income available for the year. All remaining revenue is distributed in accordance with the regulations.

<sup>\*</sup> Audit fees for 2023 are £10,000 excluding VAT (30.09.22: £9,433 excluding VAT).

# 6 Interest payable and similar charges

|                                      | 30.09.23<br>£ | 30.09.22<br>£ |
|--------------------------------------|---------------|---------------|
| Interest on bank overdrafts          | 941           | 111           |
| Interest payable and similar charges | 941           | 111           |

#### 7 Taxation

|                                   | 30.09.23<br>£ | 30.09.22<br>£ |
|-----------------------------------|---------------|---------------|
| a) Analysis of charge in the year |               |               |
| Overseas tax                      | 308,812       | 264,343       |
| Current tax charge (note 5b)      | 308,812       | 264,343       |

#### b) Factors affecting current tax charge for the year

The tax assessed for the year is lower than the standard rate of corporation tax in the UK for an Open-Ended Investment Company (20%) (30.09.22: 20%). The differences are explained below.

|  | 30.09.23<br>£ | 30.09.22<br>£ |
|--|---------------|---------------|
| Net revenue before taxation                    | 3,146,624     | 2,501,593     |
| Corporation tax at 20%                         | 629,325       | 500,319       |
| Effects of:                                    |               |               |
| Revenue not subject to taxation                | (736,795)     | (675,863)     |
| Excess management expenses not utilised        | 109,183       | 101,076       |
| Overseas tax                                   | 308,812       | 264,343       |
| Tax relief on overseas tax suffered            | (1,713)       | (1,372        |
| Realised gains on non-qualifying offshore fund |               | 75,840        |
| Corporate tax charge                           | 308,812       | 264,343       |

#### c) Deferred tax

At the year end the fund had surplus management expense of £2,524,244 (30.09.22: £1,978,332). It is unlikely that the fund will generate sufficient taxable profits in the future to utilise these expenses and, therefore, a deferred tax asset of £504,849 (30.09.22: £395,666) has not been recognised in the financial statements.

#### 8 Distributions

The distributions take account of amounts received on the issue of shares and amounts deducted on the cancellation of shares, and comprise:

| cancellation of shares, and comprise:           |           |           |
|---|-----------|-----------|
|   | 30.09.23  | 30.09.22  |
|   | £         | £         |
| Interim   | 1,159,348 | 990,855   |
| Final   | 1,847,464 | 1,328,243 |
|   | 3,006,812 | 2,319,098 |
| Add: Amounts deducted on cancellation of shares | 32,611    | 36,152    |

#### 11 Reconciliation of shares

|   | R-class<br>accumulation | S-class<br>accumulation   |
|---|-------------------------|---------------------------|
| Opening shares issued at 01.10.22<br>Share movements 01.10.22 to 30.09.23 | 13,034                  | 102,964,618               |
| Shares issued<br>Shares cancelled   | 4,268<br>(2,666)        | 32,257,267<br>(6,030,369) |
| Closing shares at 30.09.23  | 14,636                  | 129,191,516               |

#### 12 Related parties

ACD fees paid to Rathbones Asset Management Limited (the ACD) are disclosed in note 5 and amounts outstanding at the year end in note 10.

Details of shares created and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and note 8.

There were no commissions paid to stockbroking of the ACD in respect of dealings in the investments of Rathbone Enhanced Growth Portfolio during the year (30.09.22: nil).

All other amounts paid to or received from the related parties, together with the outstanding balances are disclosed in the financial statements.

At the year end there were no significant shareholders (30.09.22: nil).

#### 13 Shareholder funds

The fund has two share classes: R-class and S-class. The annual ACD charge on each share class is 1.50% and 0.50% respectivley.

The net asset value, the net asset value per share and the number of shares in issue are given in the net asset value per share and comparative tables on 157 and 158.

## 14 Contingent liabilities and commitments

There were no contingent liabilities or outstanding commitments at the balance sheet date (30.09.22: nil).

#### 15 Risk disclosures on financial instruments

In pursuing the investment objective a number of financial instruments are held which may comprise securities and other investments, cash balances and debtors and creditors that arise directly from operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for liquidations and debtors for accrued revenue.

There is little exposure to credit or cash flow risk. There are no net borrowings and little exposure to liquidity risk because assets can be readily realised to meet redemptions.

The fund holds a substantial number of Collective Investment Schemes that are designed to give overseas exposure. The fund has indirect exposure to foreign currency risk, interest rate risk and credit risk as a result of these holdings (see the portfolio statements on 160 to 164).

#### 15 Risk disclosures on financial instruments (continued)

The main risks arising from the financial instruments are:

(i) Foreign currency risk, being the risk that the value of assets and liabilities will fluctuate as a result of exchange rate movements. The value of some of the fund's underlying investments will be affected by movements in exchange rate against sterling, in respect of non-sterling denominated assets.

The table below shows the foreign currency risk profile at the balance sheet date:

|   | 30.09.23    | 30.09.22    |
|---|-------------|-------------|
|   | £           | £           |
| Currency:   |             |             |
| Canadian dollar   | 4,724       | 1,790       |
| Danish krone  | 2,506,316   | 1,865,792   |
| Euro  | 4,418,243   | 2,691,416   |
| Hong Kong dollar  | 5,137,390   | 5,609,738   |
| Japanese yen  | 8,998,734   | 6,850,766   |
| Norwegian krone   | 1,316,906   | 1,309,324   |
| Swedish krona   | 3,187,250   | 2,246,149   |
| Swiss franc   | 5,520,843   | 5,181,584   |
| US dollar   | 80,075,194  | 34,835,651  |
| Pound sterling  | 182,198,690 | 148,315,711 |
|   | 293,364,290 | 208,907,921 |
| Other net assets not categorised as financial instruments | 171,140     | 146,776     |
| Net assets  | 293,535,430 | 209,054,697 |

If GBP to foreign currency exchange rates had increased by 10% as at the balance sheet date, the net asset value of the fund would have decreased by £10,105,964 (30.09.22: £5,508,383). If GBP to foreign currency exchange rates had decreased by 10% as at the balance sheet date, the net asset value of the fund would have increased by £12,351,733 (30.09.22: £6,732,468). These calculations assume all other variables remain constant.

The comparative figures have been restated to better reflect the currency hedging which reduces the currency exposure.

#### **15 Risk disclosures on financial instruments** (continued)

(ii) Interest rate risk, being the risk that the value of investments will fluctuate as a result of interest rate charges.

The table below shows the interest rate risk profile at the balance sheet date:

|   | 30.09.23<br>£ | 30.09.22<br>£ |
|---|---------------|---------------|
| Fixed rate assets:  |               |               |
| Pound sterling  | 13,515,553    | 5,024,727     |
| Floating rate assets:                                     |               |               |
| Pound sterling  | 14,218,596    | 6,636,515     |
| Euro  | 438,519       | _             |
| US dollar   | 426,744       | _             |
|   | 15,083,859    | 6,636,515     |
| Assets on which no interest is paid:                      |               |               |
| Canadian dollar   | 4,724         | 1,790         |
| Danish krone  | 2,506,316     | 1,865,792     |
| Euro  | 27,158,928    | 16,230,736    |
| Hong Kong dollar  | 5,137,390     | 5,609,738     |
| Japanese yen  | 8,998,734     | 6,850,766     |
| Norwegian krone   | 1,316,906     | 1,309,324     |
| Swedish krona   | 3,187,250     | 2,246,149     |
| Swiss franc   | 5,520,843     | 5,181,584     |
| US dollar   | 167,975,754   | 127,600,627   |
| Pound sterling  | 46,680,406    | 35,754,203    |
|   | 268,487,251   | 202,650,709   |
| Liabilities on which no interest is paid:                 |               |               |
| Euro  | (173,635)     | (181,865)     |
| US dollar   | (2,956,408)   | (5,010,159)   |
| Pound sterling  | (592,330)     | (212,006)     |
|   | (3,722,373)   | (5,404,030)   |
| Other net assets not categorised as financial instruments | 171,140       | 146,776       |
| Net assets  | 293,535,430   | 209,054,697   |

Due to the proportion of interest bearing assets held within the portfolio, no sensitivity analysis has been prepared illustrating the impact changes in yields would have on the value of the fund's portfolio.

#### 15 Risk disclosures on financial instruments (continued)

The floating rate financial assets and liabilities comprise bank balances that earn or pay interest at rates linked to the UK base rate or its international equivalents.

|                        | 30.09.23                |                                      | 30.09.22                |                                |

<sup>\*\*\*</sup> stocks not rated by S&P and Moody.

There are no material amounts of non-interest bearing financial assets and liabilities, other than equities and collective investment schemes, which do not have maturity dates.

(iii) Market price risk, being the risk that the value of investment holdings will fluctuate as a result of changes in market prices caused by factors other than currency or interest rate movements.

The investment portfolio is exposed to market price fluctuations which are monitored by the ACD in pursuance of the investment objective and policy set out in the Prospectus. Adherence to investment guidelines and to investment and borrowing powers set out in the Instrument of Incorporation and Prospectus and the rules of the FCA's Collective Investment Scheme Sourcebook mitigates the risk of excessive exposure to any particular type of security or issuer.

If market prices had increased by 10% as at the balance sheet date the net asset value of the fund would have increased by £27,591,774 (30.09.22: £20,170,880). If market prices had decreased by 10% as at the balance sheet date the net asset value of the fund would have decreased by £27,591,774 (30.09.22: £20,170,880). These calculations assume all other variables remain constant

- (iv) Credit risk/Counterparty risk. Credit risk arises firstly from the issuer of a security not being able to pay interest and principal in a timely manner and also from counterparty risk, where the counterparty will not fulfil its obligations or commitments to deliver the investments for a purchase or the cash for a sale after the fund has fulfilled its responsibilities. In order to manage the risk, the fund will only buy and sell investments through brokers which have been approved by the Manager as an acceptable counterparty. Brokers are monitored on an on-going basis for suitability and creditworthiness. In addition, the fund is subject to investment limits for issuers of securities and issuer credit ratings are evaluated periodically.
- (v) Fair value. There is no material difference between the carrying value and fair value of the financial instruments disclosed in the balance sheet.
- (vi) Leverage. There is no significant leverage in the fund which would increase its exposure.

| Total sales including |            |        |          |     |      |
| transaction costs     | 59,227,805 | 19,691 |          | 587 |      |
| Total sales net of    |            |        |          |     |      |
| commission and taxes  | 59,207,527 |        |          |     |      |

The fund had paid £nil as commission on purchases and sale derivative transactions for the year ended 30.09.22.

Commissions and taxes as % of average net assets

Commissions 0.03% Taxes 0.02%

In the case of shares, commissions and taxes are paid by the fund on each transaction. In addition, there is a dealing spread between the buying and selling prices of the underlying investments. Unlike shares, other types of investments (such as bonds, money market instruments, derivatives) have no separately identifiable transaction costs; these costs form part of dealing spread. Dealing spreads vary considerably depending on the transaction value and market sentiment. At the balance sheet date the dealing spread was 0.19% (30.09.22: 0.29%).

#### 17 Fair value of investments

The fair value of investments has been determined using the following hierarchy:

Level 1 The unadjusted quoted price in an active market for identical assets or liabilities that the

entity can access at the measurement date.

Inputs other than quoted prices included within Level 1 that are observable (i.e. developed Level 2

using market data) for the asset or liability, either directly or indirectly.

Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. Level 3

## 18 Cross holdings

The fund did not hold shares in any of the other sub-funds of Rathbones Multi-Asset Portfolio at the period end.

#### 19 Post balance sheet event

Following a review of the R-class shares in the fund, this class will be closed and holdings will be converted into other share classes within the fund which have a lower annual management charge. These conversions will take place on 25 January 2024. There will be no tax implications for investors from this conversion and although investors will receive a different number of shares in the new class, the value of their holding will remain the same following the conversion.

#### Equalisation

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It represents the accrued revenue included in the purchase price of the shares. After averaging it is returned with the distribution as a capital repayment. It is not liable to Income Tax but must be deducted from the cost of the shares for Capital Gains Tax purposes.

# Directors' statement

This report is approved in accordance with the requirements of the Financial Conduct Authority's Collective Investment Schemes Sourcebook.

JA Rodgers T Carroll for Rathbones Asset Management Limited ACD of Rathbone Multi-Asset Portfolio 25 January 2024

# Statement of the ACD's responsibilities in relation to the annual report and accounts of the Rathbone Multi-Asset Portfolio

The Financial Conduct Authority's Collective Investment Schemes Sourcebook requires the ACD to prepare financial statements for each financial vear which give a true and fair view of the state of affairs of the Company and of the net revenue or expense and of the net gains or losses on the property of the Company for that year. In preparing those financial statements, the ACD is required to:

- 1. select suitable accounting policies, as described in the attached financial statements, and then apply them consistently:
- 2. make judgements and estimates that are reasonable and prudent;
- 3. comply with the disclosure requirements of the SORP relating to financial statements of UK authorised funds issued by The Investment Association:
- 4. follow United Kingdom Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including FRS 102 to 'The Financial Reporting Standard applicable in the UK and Republic of Ireland';
- 5. prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation: and
- 6. keep proper accounting records which enable it to demonstrate that the financial statements as prepared comply with the above requirements.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, Prospectus and the Collective Investment Schemes Sourcebook, The ACD has general responsibility for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In so far as the ACD is aware:

- there is no relevant audit information of which the Company's auditor is unaware: and
- 2. the ACD has taken all steps that they ought to have taken to make themselves aware of any relevant audit information and to establish that the auditor is aware of that information, and
- 3. the ACD is of the opinion that it is appropriate to continue to adopt the going concern basis in the preparation of the financial statements as the assets of the fund consist predominantly of securities that are readily realisable and. accordingly, the Company has adequate resources to continual in operational existence for the foreseeable future

Additionally, the Manager monitors developments in Ukraine, making adjustments to investments where deemed appropriate and they also monitor sanctions and their implications on individual holdings. Also, the investment processes and risk and compliance procedures continue to operate as normal.

In accordance with COLL 4.5.8 R, the Annual Report and the audited financial statements were approved by the board of directors of the ACD of the Scheme and authorised for issue on 25 January 2024.

# Statement of the Depositary's responsibilities and report of the Depositary to the shareholders of Rathbone Multi-Asset Portfolio ("the Company") for the Period Ended 30 September 2023

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI2001/1228) (the OEIC Regulations), as amended, the Financial Services and Markets Act 2000 as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- 1. the Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations:
- 2. the sale, issue, redemption and cancellation of shares are carried out in accordance with the Regulations:
- 3. the value of shares in the Company is calculated in accordance with the Regulations:
- 4. any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- 5. the Company's income is applied in accordance with the Regulations; and
- 6. the instructions of the Authorised Fund Manager (the "the AFM") are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and the Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company, and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

NatWest Trustee and Depositary Services Limited Depositary of Rathbone Multi-Asset Portfolio 25 January 2024

# Independent Auditor's Report to the shareholders of Rathbone Multi-Asset Portfolio

# Report on the audit of the financial statements

#### Opinion

In our opinion the financial statements of Rathbone Multi-Asset Portfolio (the 'company'):

- give a true and fair view of the financial position of the company and its sub-funds as at 30 September 2023 and of the net revenue and the net capital gains on the property of the company and its sub-funds for the year ended 30 September 2023; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", the Statement of Recommended Practice "Financial Statements of UK Authorised Funds", the rules in the Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

We have audited the financial statements which comprise for each sub-fund:

- the statement of total return;
- the statement of change in net assets attributable to shareholders:
- the balance sheet:
- the distribution tables: and
- the notes 1 to 19

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice), the Statement of Recommended Practice: "Financial Statements of UK Authorised Funds" issued by the Investment Association in May 2014 as amended in June 2017. the Collective Investment Schemes Sourcebook and the Instrument of Incorporation.

## **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

# Conclusions relating to going concern

In auditing the financial statements, we have concluded that the authorised corporate director's (ACD's) use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report.

#### Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

# Independent Auditor's Report to the shareholders of Rathbone Multi-Asset Portfolio (continued)

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements. we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

# Responsibilities of depositary and ACD

As explained more fully in the depositary's responsibilities statement and the ACD's responsibilities statement, the depositary is responsible for the safeguarding the property of the company and the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error

In preparing the financial statements, the ACD is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so

## Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/ auditorsresponsibilities. This description forms part of our auditor's report.

## Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities. outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management and the ACD about their own identification and assessment of the risks of irregularities, including those that are specific to the company's business sector.

We obtained an understanding of the legal and regulatory frameworks that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the financial statements. These included Collective Investment Schemes Sourcebook and relevant tax legislations; and
- do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included The Open-Ended Investment Companies Regulations 2001.

We discussed among the audit engagement team including relevant internal specialists such as valuations and IT specialists regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

# Independent Auditor's Report to the shareholders of Rathbone Multi-Asset Portfolio (continued)

As a result of performing the above, we identified the greatest potential for fraud in the valuation and existence of investments due to its significance to the net asset values of the company and its sub-funds. In response we have: involved our financial instruments specialists to assess the applied valuation methodologies: agreed investment holdings to independent confirmations; and agreed investment valuations to reliable independent sources.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, we tested the appropriateness of journal entries and other adjustments; assessed whether the judgements made in making accounting estimates are indicative of a potential bias; and evaluated the business rationale of any significant transactions that are unusual or outside the normal course of business

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing financial statement disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements:
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud:
- enquiring of management concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations: and
- reading minutes of meetings of those charged with governance.

# Report on other legal and regulatory requirements

## Opinions on other matters prescribed by the Collective Investment Schemes Sourcebook

In our opinion:

- proper accounting records for the company and its sub-funds have been kept and the financial statements are in agreement with those records:
- we have received all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit: and
- the information given in the ACD'S report for the year ended 30 September 2023 is consistent with the financial statements.

# Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Paragraph 4.5.12R of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Deloitte LLP Statutory Auditor Glasgow, United Kingdom 25 January 2024

## General information

#### **ACD Name**

Effective 30 November 2023, Rathbone Unit Trust Management Limited changed its name to Rathbones Asset Management Limited.

#### **Authorised status**

Rathbone Multi-Asset Portfolio (the Company) is an investment Company with variable capital (ICVC) incorporated in England and Wales under registered number 498834 and authorised by the Financial Conduct Authority on 29 May 2009.

Rathbone Multi-Asset Portfolio is structured as an umbrella scheme. Provision exists for an unlimited number of sub-funds, and at the date of this report six sub-funds, Rathbone Strategic Growth Portfolio, Rathbone Strategic Income Portfolio, Rathbone Total Return Portfolio, Rathbone Enhanced Growth Portfolio, Rathbone Defensive Growth Portfolio and Rathbone Dynamic Growth Portfolio, are available for investment. The shareholders are not liable for the debts of the Company.

Each fund represents a segregated portfolio of assets and accordingly, the asset of each fund belong exclusively to that fund and shall not be used or made available to discharge the liabilities of any other fund.

## Valuation of the sub-funds

The sub-funds are valued on each business day at 12 noon for the purpose of determining prices at which shares in the sub-funds may be bought or sold. Valuations may be made at other times on business days with the Depositary's approval.

#### Stewardship code

Rathbones Asset Management Limited fully supports the UK Stewardship Code sponsored by the Financial Reporting Council.

#### Buying and selling of shares

The ACD is available to receive requests for the buying and selling of shares on business days between 9.00am and 5.00pm and transactions will be effected at prices determined by the next valuation. Application forms for shares (obtainable from the ACD or the Administrator) should be completed and sent to the Administrator. In respect of telephoned orders, remittances should be sent on receipt of the contract note. Contract notes confirming transactions will be issued by the close of business on the next business day after the dealing date. Purchasers of shares are required to enter their registration details on the form supplied with their contract note. Once shares are paid for these details will be entered on the share register.

Shares can be sold by telephone or letter followed by despatch to the Administrator of the authorisation to sell duly completed by all shareholders

In the absence of clear written instructions signed by all the registered holders, a Form of Renunciation will be sent out together with the repurchase contract note. This will need to be signed by all registered holders, and returned to our Administrators before settlement can be made. Settlement will be made on whichever is the later of four business days after the dealing date or four days after the receipt of written confirmation.

Shareholders may sell shares on submitting the purchase contract note and a duly executed Deed of Transfer. The issue and redemption of shares will not take place if dealing in the shares is suspended by operation of law or any statute for the time being in place. Sales, in retail units, constituting a "large deal" of £50,000 or more may receive a lower price than the published price.

The minimum initial investment for the R-class is £100.000.000. The minimum initial investment for S-class shares is £1,000. Thereafter holders may invest additional amounts to the value of £500 or more from time to time as they wish. Any number of shares may be subscribed, sold or transferred so long as transaction complies with applicable minimums.

# General information (continued)

The ACD currently receives an annual remuneration for managing the R-class and S-class from the property of the fund at the rate of 1.50% and 0.5% respectively.

#### Statements

A distribution statement showing the rate per share and your shareholding will be sent half yearly on the 31 May and 30 November.

The current value of your shares is shown on a valuation statement, which shows the number of shares bought over the previous six months. the total number of shares in your account and their current value.

Twice yearly on 30 June and 31 December. shareholders will receive a consolidated valuation statement showing, where applicable, their ICVC, Unit Trust and ISA holdings for each fund held.

#### **Prices**

Prices are available on our website rathbonesam com

#### Other information

Copies of the Prospectus. Key Investor Information Document, Supplementary Information Document and the most recent half yearly report of each fund may be obtained free of charge on application to the ACD or seen by visiting their registered office.

The Register of Shareholders can be inspected during normal business hours at the office of the Registrar, SS&C Financial Services International Limited, SS&C House, St Nicholas Lane, Basildon, Essex SS15 5FS.

Further copies of this report are available upon request, free of charge, from Client Services Department, Rathbones Asset Management Limited, 8 Finsbury Circus, London EC2M 7AZ.

If you have any queries or complaints about the operation of the Company you should put them to the Compliance Officer, Rathbones Asset Management Limited, 8 Finsbury Circus, London EC2M 7AZ. Any complaint we receive will be handled in accordance with our internal complaint procedures. A copy of these are available from the Compliance Officer

If you have occasion to complain, and in the unlikely event that you do not receive a satisfactory response, you may direct your complaint to the Financial Ombudsman Service at Exchange Tower, London E14 9SR. Further details about the Financial Ombudsman Service are available on their website at financial-ombudsman.org.uk

# ISA eligibility

The fund has been managed throughout the year to ensure that it is eligible to qualify and be included in an Individual Savings Account (ISA). The fund will at all times be invested in such a way that the units will constitute "Oualifying Investments" for the purposes of the Individual Savings Account (ISA) Regulations 1998, as amended from time to time.

#### Risk factors

Investments in an investment Company with variable capital should be regarded as a longer term investment. Investors should be aware that the price of shares and the income from them can fall as well as rise and investors may not receive back the full amount invested. Past performance should not be seen as an indication of future performance. Investments denominated in currencies other than the base currency are subject to fluctuations in exchange rates which can be favourable or unfavourable. Where the ACD's charge is fully or partly taken out of the fund's capital, distributable income will be increased at the expense of capital which will either be eroded or future growth restricted.

#### Value assessment

Our regulator, the Financial Conduct Authority (FCA), has asked us to assess the value of our funds. Assessing value is much more than just looking at the fees you pay or the performance of your fund in isolation. Considering this, we have designed an assessment which looks at nine criteria.

We have also appointed an independent research firm, Square Mile Investment Consulting & Research, to provide an impartial report on the value our funds offer compared with the market.

It is the responsibility of our board of directors to consider the outcomes of these assessments, ensure they are clear and fair, and then communicate to you, our investors, if we have delivered value or, if not, where we need to improve.

You can view the value assessments for the Funds four months after their period end on our website rathbonesam.com

# General information (continued)

#### **UCITS Remuneration**

In line with the requirements of the UCITS Directive, Rathbones Asset Management Limited (the Manager) has adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies. Its purpose is to ensure that the remuneration of the staff of the Manager is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles of the Manager and the UCITS that it manages and does not impair the Manager's compliance with its duty to act in the best interests of the UCITS it manages. The remuneration policy applies to staff of the Manager whose professional activities have a material impact on the risk profile of the Manager or the UCITS that it manages (known as Remuneration Code Staff).

The aggregate remuneration paid by the Manager to its staff, and to those staff who are identified as Remuneration Code Staff, is disclosed below.

|                               | Fixed<br>remuneration<br>£'000 | Variable remuneration £'000 | Total<br>remuneration<br>£'000 | Headcount |
|-------------------------------|--------------------------------|-----------------------------|--------------------------------|-----------|
| Senior Management             | 2,198                          | 4,428                       | 6,626                          | 9         |
| Risk takers                   | 2,301                          | 2,386                       | 4,687                          | 16        |
| Control functions             | 93                             | 31                          | 124                            | 3         |
| Other                         | 153                            | 121                         | 274                            | 1         |
| Total remuneration code staff | 4,745                          | 6,966                       | 11,711                         | 29        |
| Non-remuneration code staff   | 1,360                          | 240                         | 1,601                          | 22        |
| Total for the Manager         | 6,105                          | 7,206                       | 13,312                         | 51        |

The variable remuneration disclosed in the table above is for the financial year ended 31 December 2022. which is the most recent period for which data are available. Variable remuneration is determined annually based on, inter alia, the results of the Manager and the investment performance of the UCITS that it manages for discrete annual periods ending on 31 December each year. Consequently, it is not possible to apportion the variable award between calendar years.
