## Rathbone Heritage Fund (I-Class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B8CJW049

Income units ISIN: GB00B6SCP824

### Objectives and investment policy

The fund's objective is to provide long-term total returns with a strong focus on capital preservation by mitigating downside risk through a robust investment process (capital preservation is not however guaranteed).

Under normal circumstances, the fund invests in shares of companies from around the world.

The fund may also invest in other securities permitted by the prospectus. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging) and to seek investment gains.

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual companies that can offer the best overall combination of price, risk, income and growth prospects.

**Designed for:** Investors who understand the fund risks, want an investment that combines income and growth, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

### Terms to understand

**Derivatives:** Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

**Hedging:** Using techniques to partially cancel out risks.

**Shares:** For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from portions of this fund).

### Risk and reward profile

Lower potential risk/reward Higher potential risk/reward  
(Not risk-free)

The risk indicator for this fund reflects the following:

– As an asset class, shares have greater risk than either bonds or money market instruments.

The risk profile is based on past model portfolio data and may not be a reliable indication of the future risk profile of the fund, which may alter over time.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

**Counterparty risk:** The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

**Currency risk:** Changes in currency exchange rates could adversely affect fund performance.

**Derivatives risk:** Derivatives and forward transactions may be used by the fund for investment purposes as well as for efficient portfolio management (including hedging). The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

**Liquidity risk:** During difficult market conditions, some securities may become hard to value or sell at a desired price.

**Management risk:** Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

For full details of the risk factors, please refer to the Prospectus.
