Rathbone Global Opportunities Fund (R-Class)

Fund Manager: Rathbone Unit Trust Management Limited
Accumulation units ISIN: GB0030349095

Objectives and investment policy

The fund's objective is to seek above-average growth of your investment over the long term.

Under normal circumstances, the fund invests mainly in shares of companies from around the world. The fund generally invests in companies that appear poised for above-average expansion yet have not been recognised by the market.

The fund may also invest in other securities permitted by UCITS regulations. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual companies that can offer the best overall combination of price, risk and growth prospects.

Designed for: Investors who understand the fund risks, want an investment that focuses on growth, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any dividends received are added to the unit price).

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Shares: For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from portions of this fund).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

– As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

Currency risk: Changes in currency exchange rates could adversely affect fund performance.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.
