Rathbone UK Opportunities Fund (R-Class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB0030430804

Income units ISIN: GB0005062293

Objectives and investment policy

The objective of the fund is to achieve capital growth by buying shares in companies whose potential is not appreciated by the market and to sell them when this potential is recognised. The nature of unrecognised potential may be macro, industry, sector or stock specific. Stock selection will involve the identification of a catalyst to drive value creation. The fund has the flexibility to invest in companies of all sizes, primarily companies domiciled, incorporated or having a significant part of their business in the UK, although it may hold up to 20% in shares of European companies. It is benchmarked against the FTSE All-Share index.

Under normal circumstances, the fund invests mainly in shares from the UK, but may also invest in those from companies in Europe. The fund generally invests in a relatively small number of companies.

The fund may also invest in other securities permitted by UCITS regulations. The fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual companies that potentially are undervalued and for which a specific reason for a likely increase in value can be identified.

Designed for: Investors who understand the fund risks, want an investment that focuses on capital growth, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

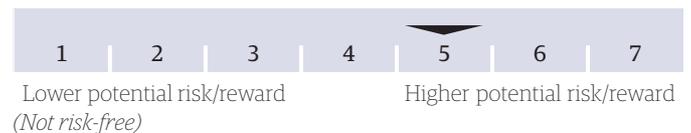

Terms to understand

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Shares: For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from portions of this fund).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: The fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the fund.

Currency risk: Changes in currency exchange rates could adversely affect fund performance.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.
