## You should know

### Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

The use of derivatives for investment purposes may increase the volatility of a sub-fund's net asset value and may increase its risk profile.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

As the Manager's annual fee is taken from capital, that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying shareholders.

### Information notes

^The OCF includes the charges for the underlying funds held in the product. From April 2018, the Ongoing Charges Figure has been calculated according to PRIIPs regulations, which came into effect on 1 January 2018. Holdings are based on six monthly audited accounts. Changes to fund holdings within this period may result in higher or lower ongoing charges.

Source performance data Financial Express, mid to mid, net income re-invested. This is net of expenses and tax. Data using prices as at 31.03.2019. UK Consumer Price Inflation figures quoted with a one month lag. The volatility as a percentage of the MSCI World Index figures given on a 3 year rolling basis. \*\*\*Volatility, Sharpe Ratio and Maximum Drawdown given on a 3 year rolling basis. Sharpe Ratio calculated using Risk Free Rate of 0.55 (based on 3 month LIBOR). Turnover is calculated on a 1 year rolling basis.

### Rathbone Multi-Asset Strategic Growth

**Portfolio Benchmark:** Our benchmarks are calculated on the rate of change of the CPI index, over different time periods (e.g. if we were calculating year to date figures in January 2013, we would look at the percentage change from December 2012 to the end of January 2013). So we take CPI to the current value, and add on the 5% prorated over a year (roughly 0.42% per month). If the CPI Index benchmark were to fall, more than the amount pro-rata, the benchmark year-to-date will be negative, even though inflation as reported by the media (calculated specifically as a 12M rate of change), remains positive.

Source and Copyright Citywire: David Coombs is AA rated by Citywire for his three year risk adjusted performance for the period 31.03.2016-31.03.2019.

Rathbone Unit Trust Management has achieved a Gold Rating in the Mixed Asset – Absolute Return sector by Citywire for their rolling risk-adjusted performance, across all management teams in the sector, over the period 30.03.2012-31.03.2019.

The 'Scopic Multi-Manager Portfolio Rating' shown was awarded following extensive due diligence and face to face manager questioning. It was arrived at by combining the ratings awarded for the individual research topics (summarised in the report, available at rathbonefunds.com) and weighting them according to a formula. All ratings are qualitative based.
