

Rathbone Strategic Bond Fund

Investment objective

We aim to deliver a greater total return than the Investment Association (IA) Sterling Strategic Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Strategic Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We aim to deliver this return with a lower volatility than the IA Sterling Strategic Bond sector. As an indication, the value of our fund should be expected to fluctuate less than the sector. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking compared to funds similar to ours.

Investment strategy

When picking our investments, there are three assessments we make. First, we look at the economic environment to determine which industries we want to own and the duration of our investments. Then we use the Four Cs Plus approach to evaluate creditworthiness. We assess:

Character: Whether a company's managers have integrity and competence

Capacity: Ensuring a company isn't over-borrowing and has the cash to pay its debts

Collateral: Are there assets backing the loan, which reduces the risk of a loan

Covenants: These loan agreements set out the terms of the bond and restrictions on the company

Conviction: The Plus: We think differently to the market; sometimes contrarian, sometimes sceptical of orthodox thinking, but always opinionated

Finally, we compare prices to determine the best value bonds to include in our fund.

You should know

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

Changes in rates of exchange between currencies may cause the value of investments to decrease or increase. Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have any doubts about your tax position, or the suitability of this investment, you should seek professional advice.

Interest rate fluctuations are likely to affect the capital value of investments within bond funds. When long term interest rates rise the capital value of units is likely to fall and vice versa. The effect will be more apparent on funds that invest significantly in long-dated securities. The value of capital and income will fluctuate as interest rates and credit ratings of the issuing companies change.

Derivatives and forward transactions may be used by the fund for investment purposes as well as for the purposes of efficient portfolio management (including hedging). The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.

To meet the investment objective, the fund may also invest, at the Manager's discretion, in other transferable securities, money market instruments, warrants, cash and near cash and deposits. Use may be made of stocklending, borrowing, hedging and other investment techniques permitted by the FCA rules and by the investment limits set out in the Prospectus.

As the Manager's annual fee is taken out from capital, distributable income will be increased at the expense of capital which will either be eroded or future growth constrained. All charges are deducted from the fund's capital.

Information notes

*The historic distribution yield reflects the annualised income net of the expenses in the fund (calculated in accordance with the relevant accounting standards) as a percentage of the mid-market unit price of the fund as at the date shown. It is based on a snapshot of the portfolio on that day. It does not include any initial charge and investors may be subject to tax on their distributions.

^The ongoing charges figure (OCF) includes the Annual Management Charge and all appropriate costs that may be deducted from the fund's assets, in line with current regulatory and industry guidance. Where appropriate, the OCF may include a synthetic element relating to the costs incurred in underlying collective investment undertakings, where permitted by the Prospectus. The OCF is included in the Annual or Interim report.

Source performance data FE fundinfo, price performance based upon bid to bid prior to 21.01.19 and single price (mid) thereafter. This is net of expenses and tax. Data using prices as at 28.02.2023. **Volatility and Maximum drawdown given on a 5 year rolling basis.

***Turnover is calculated on a 1 year rolling basis.
