

Rathbone Heritage Fund

Investment objective

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 3%, after fees, over any rolling 10-year period by investing with our valuation-linked cash management mechanism. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend payments). We use the CPI + 3% as a target for our fund's return because we aim to grow your investment above inflation.

We also compare our fund against the FTSE World Index so that you can see how global stock markets have performed.

Investment strategy

This is a stock-picking fund, which means we invest in a small number of global stocks. We specialise in choosing good companies rather than making broad bets on which industries or countries will offer better returns.

When choosing investments we use our own trinity of risk framework: price, business and financial. We look for businesses that offer good value and make strong and consistent profits with high quality earnings - those that are backed by real cash rather than accounting contrivance. Companies shouldn't have more debt than they can handle.

We buy these companies because we believe they should grow steadily over many years. A healthy cash flow - earnings backed by cash - allows them to invest back into their businesses driving this future growth, and any cash left after this can be returned to shareholders so they can invest in opportunities elsewhere.

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

To meet the investment objective, the fund may also invest, at the Manager's discretion, in other transferable securities, approved money market instruments, warrants, cash and near cash, deposits and units in collective investment schemes. Use may be made of stocklending, borrowing, hedging and other investment techniques permitted by the FCA rules.

As the Manager's annual fee is taken from capital, this will mean that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying unitholders. All other income expenses are paid out of the fund's income.

Derivatives and forward transactions may be used by the fund for investment purposes as well as for the purposes of efficient portfolio management (including hedging). The use of derivatives for investment purposes may increase the volatility of the fund's Net Asset Value and may increase its risk profile.
