Rathbone Ethical Bond Fund (I-class)

Fund Manager: Rathbone Unit Trust Management Limited

Accumulation units ISIN: GB00B77DQT14

Income units ISIN: GB00B7FQJT36

Objectives and investment policy

We aim to deliver a greater total return than the Investment Association (IA) Sterling Corporate Bond sector, after fees, over any rolling five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest payments). We use the IA Sterling Corporate Bond sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We will invest at least 80% of our fund in corporate bonds with an investment-grade rating (AAA to BBB-), based on the average of the three largest rating agencies (Standard & Poor's, Moody's and Fitch). We can invest up to 20% of our fund in corporate bonds with a credit rating below BBB- or with no rating at all. Up to 10% of the fund can be invested directly in contingent convertible bonds. These specialist bonds, typically issued by banks and insurers, are forcibly replaced with shares if the issuer experiences heavy losses. At least 80% of the portfolio will be invested in sterling bonds or in overseas assets whose value we have hedged back to sterling. Hedging means we buy a financial instrument to swap the value of these assets into sterling to protect our investment from changes in the price of foreign currencies.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund's ethical and sustainability criteria are applied by Rathbone Greenbank Investments, an ethical research division of our company, which cannot be influenced by our fund managers. Companies are assessed against positive and negative social and environmental criteria.

For us to invest in a company, it must satisfy at least one of the following: strong employment practices, sustainable environmental practices or community engagement and commitment to human rights.

We do not invest in companies engaged in the following:

- Alcohol manufacturing
- Human rights abuses
- Poor employment practices
- Animal welfare violations
- Pornography
- Gambling
- Carbon-intensive industries
- Alcohol retail
- Nuclear power
- Polluting the environment
- Armaments
- Tobacco manufacturing

Our fund is designed for investors with a basic knowledge of bonds who seek income and growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any income payable by the fund is reinvested) and income units (units in which any income received in the fund will be paid to the unitholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the fund.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Derivatives risk: Sometimes we use financial contracts to reduce risk. There is a chance that these derivatives won't work in the way we intended, which could result in unexpected gains or losses.

Liquidity risk: Some assets held in this fund can be hard to sell, especially in times of market stress. This could mean that if we had a lot of money redeemed from our fund in a short period of time, we might not be able to meet our obligations. In this circumstance, we are able to suspend our fund until we could find a buyer for these assets. This would result in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Interest rate risk: Most bonds pay us a fixed amount over an agreed period of time. If interest rates rise these bonds become less valuable and we may be locked into an unfavourable investment. If interest rates fall these bonds become more valuable.
