

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone SICAV Multi-Asset Enhanced Growth Portfolio (LO-class Acc USD)

A sub-fund of the Rathbone Luxembourg Funds SICAV
 Management Company: FundRock Management Company S.A.
 Accumulation shares ISIN: LU2432164510

Objectives and investment policy

The sub-fund's objective is to deliver a greater total return than the United Kingdom's Consumer Price Index (CPI) measure of inflation + 5%, after fees, over any rolling five-year period by investing with the Liquidity, Equity-type risk and Diversifier assets (LED) framework developed by the investment manager. The sub-fund aims to deliver this return with no more volatility than that of the FTSE Developed Market Index. There is no guarantee that the sub-fund will achieve a positive return over this, or any other, period and you may not get back the original amount you invested.

Under normal circumstances the sub-fund invests mainly in shares from the UK and elsewhere and in other securities, including bonds and money market instruments. The sub-fund will ordinarily invest in these securities directly, but may gain exposure to them by investing in other collective investment schemes (sub-funds, such as unit trusts, UCITS and OEICs).

The sub-fund may also invest in other securities permitted by the Prospectus. The sub-fund may use investment techniques and derivatives for efficient portfolio management (including hedging) and to seek investment gains.

The sub-fund is managed at the fund manager's discretion. The manager uses its own analysis to determine an overall allocation amongst different asset classes based on anticipated growth and income over the long term.

The sub-fund does not integrate sustainability risks into its investment decision making process.

Designed for: Investors who understand the sub-fund risks, want an investment that focuses on growth, and intend to invest their money in these investments for a minimum of five to ten years, preferably longer.

You can buy and sell units on each business day of the sub-fund between 9am and 5pm Luxembourg time.

Bonds: Securities that represent an obligation to repay a debt, along with interest.

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Money market instruments: High-quality investments that pay interest and are designed to maintain a stable value.

Shares: For the purposes of the investment policy, securities that represent fractional ownership in a company (as distinct from shares in this sub-fund).

Risk and reward profile

This indicator is a measure of the sub-fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the sub-fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this sub-fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.
- As this share class is less than five years old, the indicator is not based solely on actual performance.

The value of investments in the sub-fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the sub-fund may increase significantly, and in addition, the sub-fund may be subject to the following risks:

Counterparty risk: The sub-fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the sub-fund.

Currency risk: Changes in currency exchange rates could adversely affect sub-fund performance.

Default risk: The issuers of certain bonds could become unable to make payments on their bonds.

Derivatives risk: The use of derivatives for investment purposes may increase the volatility of the sub-fund's net asset value and may increase its risk profile.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.

Sustainability risk: Is an environmental or social event that could cause a material fall in value of the sub-fund.

Charges for this fund

The fund manager receives an annual fee, which is included in the ongoing charges shown below. Ongoing charges are the same for all investors in this share class.

The charges shown below are based on actual fees and expenses for the rolling year ending 30 September 2022.
