Rathbone Strategic Growth Portfolio

Investment objective

We aim to deliver a greater total return than the Consumer Price Index (CPI) measure of inflation + 3%, after fees, over any rolling five-year period by investing with our Liquidity, Equity-type risk and Diversifiers (LED) framework. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use the CPI + 3% as a target for our fund's return because we aim to grow your investment above inflation.

We aim to deliver this return with no more than two-thirds of the volatility of the FTSE Developed stock market Index. As an indication, if global stock markets fall our fund value should be expected to fall by around two-thirds of that amount. Because we measure volatility over a five-year period, some falls may be larger or smaller over shorter periods of time. We aim to limit the amount of volatility risk our fund can take because we want our investors to understand the risk they are taking in terms of the global stock market.

Fund facts

Authorised Corporate Director (Manager)
Rathbone Unit Trust Management Limited

Fund performance over 5 years

31 May 17 to 31 May 22, mid-mid, UK basic rate in UK Sterling, percentage change.

****Please note that the change in size of fund is as a result of the Luxembourg SICAV version of this fund converting from a master feeder structure to a directly managed fund. If you have any questions please contact your financial adviser.**

Management

David Coombs
Fund Manager, Head of Multi-Asset Investments

David heads up the team responsible for managing the Rathbone Multi-Asset Portfolios. He joined Rathbones in 2007 after spending 19 years with Baring Asset Management where he managed multi-asset funds and segregated mandates. His career began with Hambros Bank in 1984.

Will McIntosh-Whyte
Fund Manager

Will is a fund manager on the Rathbone Multi-Asset Portfolios, the offshore Luxembourg-based SICAVs as well as the Rathbone Managed Portfolio Service (MPS), working alongside David Coombs. Will joined Rathbones in 2007 having graduated from UMIST with a BSc Hons in Management and is a CFA Charterholder.

You should know

Important information

Copies of the Prospectus, the Key Investor Information Document (KIID), the Supplementary Information Document (SID), and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

The use of derivatives for investment purposes may increase the volatility of a sub-fund's net asset value and may increase its risk profile.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

As the Manager's annual fee is taken from capital, that capital may be eroded or growth restricted to the extent of the charge and that, while there may as a result be a reduction in liability for Capital Gains Tax, there will be some increase in Income Tax liability for tax paying shareholders.

Information notes

[^]The OCF includes the charges for the underlying funds held in the product. From April 2018, the ongoing charges figure has been calculated according to PRIIPs regulations, which came into effect on 1 January 2018. Holdings are based on six monthly audited accounts. Changes to fund holdings within this period may result in higher or lower ongoing charges.

^{*}(Targeting $\leq 66.67\%$).

Source performance data FE fundinfo, mid to mid, net income re-invested. This is net of expenses and tax. Data using prices as at 31.05.2022. UK Consumer Price Inflation figures quoted with a one month lag. The volatility as a percentage of the FTSE Developed Index figures given on a 3 year rolling basis. ^{***}Volatility, Sharpe Ratio and Maximum Drawdown given on a 5 year rolling basis. Sharpe Ratio calculated using a Risk Free Rate based on SONIA. Turnover is calculated on a 1 year rolling basis.

Rathbone Multi-Asset Strategic Growth Portfolio Benchmark

Our benchmarks are calculated on the rate of change of the CPI index, over different time periods (e.g. if we were calculating year to date figures in January 2013, we would look at the percentage change from December 2012 to the end of January 2013). So we take CPI to the current value, and add on the 3% prorated over a year (roughly 0.25% per month). If the CPI Index benchmark were to fall, more than the amount pro-rata, the benchmark year-to-date will be negative, even though inflation as reported by the media (calculated specifically as a 12M rate of change), remains positive.

Source and Copyright Citywire: David Coombs is + rated by Citywire for his three year risk adjusted performance for the period 30.04.2019-30.04.2022.

Rathbone Unit Trust Management has achieved a Gold Rating in the Mixed Asset – Absolute Return sector by Citywire for their rolling risk-adjusted performance, across all management teams in the sector, over the period 31.01.2015-31.01.2022.
